This book offers a systematic literature review and a set of empirical studies on supply chain integration. Supply chain management is recognized as an essential means for firms to achieve competitive advantages in which supply chain integration is regarded as the core for operational excellence shorter lead time lower inventory faster delivery and higher product and service quality. Using data from an international survey of manufacturing firms an interrelated set of studies that investigate supply chain integration from different perspectives at multiple levels are conducted. Intra organizational factors such as products production systems and socio technical systems are examined to understand their effects on supply chain integration indicating that firms need to implement different types of supply chain integration for specific competitive priorities. Then the outcomes of supply chain integration including its impact on risk management and sustainability management are investigated from an inter organizational perspective. The firm is embedded in a manufacturing network a global supply chain or both and it can use supply chain integration as a strategic action for risks. Sustainability has been a vital issue for manufacturers and supply chain integration can enhance its success. This book makes significant contributions to the relevant literature on supply chain integration and offers insights to supply chain managers in manufacturing industries.

The purpose of this study was to test and redefine the measurement of supply chain integration practices in the manufacturing industry in Malaysia as a developing country. The study employed a survey method where data collection was done through a questionnaire composed of supply chain integration dimensions internal integration and external integration. Data was obtained from 113 respondents from

manufacturing firms across malaysia the collected responses were analysed using partial least square based structural equation modeling pls to test and validate supply chain integration measurement and its model confirmation in a developing country findings suggest that supplier customer and internal integration eminently established inter organisational capabilities through supply chain integration both externally and internally the sample consisted logistics managers supply chain managers and operational managers with vast operational experience as there was only one respondent from each of the firms it is open to response biasness managers from manufacturing firms in malaysia could employ the selected supply chain integration elements in developing key performance indicators to enable and enhance inter organisational capabilities the research is an original contribution to the body of knowledge as supply chain integration is used to measure inter organisational integration among manufacturing firms in a developing country like malaysia something that has not been attempted by researchers in this field

the economic crisis has demonstrated that highly integrated supply chains are as strong as their weakest link therefore one of the key topics in supply chain research has recently been how companies integrate externally with customers to adapt to changing demands and with suppliers to ensure efficient and highly responsive material supply chen et al 2009 rosenzweig et al 2003 van der vaart and van donk 2008

research on supply chain integration has focused on customer and supplier integration as well as on internal or intra organizational integration which improves the interfaces among corporate functions however research on the contribution of supply chain integration to performance has shown inconsistent results few studies take interactions among the integration perspectives into account recently flynn et al 2010 tried to find evidence for a moderating effect of internal integration since internal integration is a prerequisite for external integration morash and clinton 1998 we propose that the relationship between internal integration and performance is mediated by external integration specifically we find evidence that internal integration has a significant effect on operational performance which is mediated by customer integration moreover our research reveals that the interactions among internal customer and supplier integration go beyond the findings of flynn et al 2010 which projected that asymmetric customer oriented integration patterns are more efficient than balanced integration patterns
