from the early modern period greek historiography has been studied in the context of cicero's notion *historia magistra vitae* and considered to exclude conceptions of the future as different from the present and past comparisons with the roman judeo christian and modern historiography have sought to justify this perspective by drawing on a category of the future as a temporal mode that breaks with the present in this volume distinguished classicists and historians challenge this contention by raising the question of what the future was and meant in antiquity by offering fresh considerations of prognostic and anticipatory voices in greek historiography from herodotus to appian and by tracing the roots of established views on historical time in the opposition between antiquity and modernity they look both at contemporary scholarly argument and the writings of greek historians in order to explore the relation of time especially the future to an idea of the historical that is formulated in the plural and is always in motion by reflecting on the prognostic of historical time the volume will be of interest not only to classical scholars but to all who are interested in the history and theory of historical time

what has really happened in poland since the election of 2005 after such spectacular events as the practice of lustration and the questioning of solidarity with the european union one has to ask what is the nature of this newly emerging society as with many of the recent developments in former communist countries that seem to be mysterious and irrational the situation and ensuing problems are complex and the answers neither trivial nor easy this book by the distinguished polish philosopher addresses these complexities through the role of the communist past in post communist poland it describes the events that led to the collapse of the solidarity program and the growing influence of the nationalistic and religious parties in the government the author investigates the nature of social and political temporality and develops a theoretical framework that allows him to apply his conclusions not only to poland but also to other formerly communist countries
