sudduth provides a critical exploration of classical empirical arguments for survival arguments that purport to show that data collected from ostensibly paranormal phenomena constitute good evidence for the survival of the self after death utilizing the conceptual tools of formal epistemology he argues that classical arguments are unsuccessful

this book develops and applies a novel kind of explanation empty base explanation while ordinary explanations have a tripartite structure involving an explanandum a base of reasons why the explanandum obtains and a link that connects the reasons to the explanandum this book argues that there are explanations whose corresponding set of reasons is empty this novel idea is located in the theoretical background of several fundamental philosophical issues for example it provides a convincing kind of ultimate or final explanation that completely and conclusively explains a phenomenon without involving other phenomena for which further explanations could be demanded the possibility and fruitfulness of empty base explanation is defended by general considerations from the theory of explanation as well as concrete applications to the practice of explanation by status the explanation of logical theorems causal connections and laws of nature self explanation the use of ibe in metaphysics the notion of zero ground which it provides with a solid theoretical footing and ultimate explanation and its application to philosophical cosmology the debate about the psr and the question of why there is anything at all

for this book yannic kappes has received the 2022 de gruyter prize for ontology and metaphysics from the german society for analytic philosophy gap

a focus on reasons for action and practical reason is the perspective chosen by many contemporary legal philosophers for the analysis of some central questions of their discipline this book offers a critical evaluation of that approach by carefully examining the empirical logical and normative problems hidden behind the concepts of reason for action and practical reasoning unlike most other works in this field it is a meta theoretical study which analyses and compares how different theories use the notion of reason in their reconstruction of problems concerning issues such as normativity the acceptance of norms or the justification of judicial decisions this book is directed primarily to scholars specializing in legal theory and concerned with the contribution practical philosophy can make to it but it also contains important arguments and insights for all those interested in the controversy between legal positivists and their critics in the theory of human action or in reason based practical theories in general

this book examines the various norms for the logic and methodology of science placing them in the context of the cognitive interests and explanatory ideals that motivate science various themes in the philosophy of science are examined including the views of k popper t kuhn and i laudan characteristic cases of scientific theories are examined in order to illustrate and justify the proposed norms these include on the one hand the emergence of the science of galileo kepler and newton from the older metaphysical style of explanation to be found in aristotle and on the other hand darwin s theory of natural selection also included are characteristic cases of pseudoscience including creation science lysenkoism velikovsky ufos and ancient astronauts astrology parapsychology and various kinds of alternative medicine from these examples and the more theoretical discussion there emerges a series of norms for demarcating science and pseudoscience various aspects of the scientific method are examined in detail including the role of hypotheses the logical structure of theories and how these relate to the experimental methods of john stuart mill collection for example what do we say about observational reports of the existence

of ufos in this context there is a discussion of some of the issues raised in the so called science wars it is concluded that the sociology of science can at times be helpful to the scientific community in improving their methods of investigation

a contemporary collection of readings in metaethics this work discusses whether moral properties exist and how they fit into the world as science conceives it it is useful for the study of metaethics at undergraduate and postgraduate level

these previously unpublished essays present the newest developments in the thought of philosophers working on action and its explanation focusing on a wide range of interlocking issues relating to agency deliberation motivation mental causation teleology interpretive explanation and the ontology of actions and their reasons
