as we prepare the second canadian edition of this textbook we reflect on the positive response to the previous edition and we are pleased to find that our scientist practitioner approach still resonates with both students and professors abnormal psychology remains one of the most popular courses among undergraduate students as national and world events impel us to advance our understanding of human behaviour and the forces that influence it for example why would a celebrity who seemingly has everything wealth family fame shoplift a 50 item of jewellery the answer to such a question does not come easily as we see with simplistic answers such as the measles vaccine causes autism a theory first accepted and now completely discredited the second canadian edition of this textbook is another opportunity for students to see science in action based on the diagnostic schemas of the diagnostic and statistical manual of mental disorders fifth edition dsm 5 students are exposed to the evolving nature of our catalog of psychological disorders as research sheds new light on syndromes and forces scientists and clinicians to grapple with disparate data sets and to work together to produce a scientifically accurate and clinically meaningful system for understanding and communicating about abnormal behaviour because the dsm 5 is still relatively new there are some areas of abnormal behaviour where the research has not yet caught up to the new diagnostic criteria this is particularly relevant in chapters where revisions to the diagnoses were extensive the new criteria have been adopted however the epidemiological data for the new disorders are not available researchers simply have not had time to conduct studies using the new criteria in those instances we rely on the published data based on the dsm iv categories while giving appropriate caveats to help bridge the transition to the dsm 5 criteria

for courses in abnormal psychology abnormal psychology a scientist practitioner approach portrays the human face of various psychological conditions helping students to understand that abnormal behavior is complex and subject to many different forces authors deborah beidel cynthia bulik and melinda stanley all active researchers clinicians and educators bring abnormal psychology to life via a scientist practitioner approach that integrates biological data with research from the social and behavioural sciences the 4th edition offers expanded coverage of disorders emphasised in the dsm 5 as well as discussions of contemporary issues that foster student interest

this resource provides up to date information on the evaluation and utility of the schema concept and core beliefs as they apply to the research and treatment of a variety of clinical problems including both major and chronic depression post traumatic stress disorder substance use disorders obsessive compulsive disorder schizophrenia eating disorders and
