as businesses are continuously developing new services procedures and standards electronic business has emerged into an important aspect of the science field by providing various applications through efficiently and rapidly processing information among business partners research and development in e business through service oriented solutions highlights the main concepts of e business as well as the advanced methods technologies and aspects that focus on technical support this book is an essential reference source of professors students researchers developers and other industry experts in order to provide a vast amount of specialized knowledge sources for promoting e business

this is the first text to cover all aspects of solution processed functional oxide thin films chemical solution deposition csd comprises all solution based thin film deposition techniques which involve chemical reactions of precursors during the formation of the oxide films i e sol gel type routes metallo organic decomposition routes hybrid routes etc while the development of sol gel type processes for optical coatings on glass by silicon dioxide and titanium dioxide dates from the mid 20th century the first csd derived electronic oxide thin films such as lead zirconate titanate were prepared in the 1980 s since then csd has emerged as a highly flexible and cost effective technique for the fabrication of a very wide variety of functional oxide thin films application areas include for example integrated dielectric capacitors ferroelectric random access memories pyroelectric infrared detectors piezoelectric micro electromechanical systems antireflective coatings optical filters conducting transparent conducting and superconducting layers luminescent coatings gas sensors thin film solid oxide fuel cells and photoelectrocatalytic solar cells in the appendix detailed cooking recipes for selected material systems are offered

mineralogy includes thirteen chapters that discuss the methodology of specific mineralogical methods the composition of minerals from different igneous rocks and the composition of minerals from different sedimentary rocks it contains detailed mineralogical studies from africa asia and europe chapters present different scientific mineralogical methods and detailed descriptions of minerals from different magmatic and sedimentary rocks

gerad celebrates this year its 25th anniversary the center was created in 1980 by a

small group of professors and researchers of hec montreal mcgill university and of the ecole polytechnique de montreal gerad's activities achieved sufficient scope to justify its conversion in june 1988 into a joint research centre of hec montreal the ecole polytechnique de montreal and mcgill university in 1996 the universite du quebec a montreal joined these three institutions gerad has fifty members professors more than twenty research associates and post doctoral students and more than two hundreds master and ph d students gerad is a multi university center and a vital forum for the development of operations research its mission is defined around the following four complementarily objectives the original and expert contribution to all research fields in gerad's area of expertise the dissemination of research results in the best scientific outlets as well as in the society in general the training of graduate students and post doctoral researchers the contribution to the economic community by solving important problems and providing transferable tools

over the last two decades the topic of forest ecosystem services has attracted the attention of researchers land managers and policy makers around the globe the services rendered by forest ecosystems range from intrinsic to anthropocentric benefits that are typically grouped as provisioning regulating supporting and cultural the research efforts assessments and attempts to manage forest ecosystems for their sustained services are now widely published in scientific literature this volume focuses on broad scale aspects of forest ecosystem services beyond individual stands to large landscapes in doing so it illustrates the conceptual and practical opportunities as well as challenges involved with planning for forest ecosystem services across landscapes regions and nations the goal here is to broaden the scope of land use planning through the adoption of a landscape scale approach even though this approach is complex and involves multiple ecological social cultural economic and political dimensions the landscape perspective appears to offer the best opportunity for a sustained provision of forest ecosystem services
