this book develops a philosophico methodological analysis of prediction and its role in economics  
 prediction plays a key role in economics in various ways it can be seen as a basic science as an  
 applied science and in the application of this science first it is used by economic theory in order to  
 test the available knowledge in this regard prediction has been presented as the scientific test for  
 economics as a science second prediction provides a content regarding the possible future that can  
 be used for prescription in applied economics thus it can be used as a guide for economic policy i e  
 as knowledge concerning the future to be employed for the resolution of specific problems third  
 prediction also has a role in the application of this science in the public arena this is through the  
 decision making of the agents individuals or organizations in quite different settings both in the  
 realm of microeconomics and macroeconomics within this context the research is organized in five  
 parts which discuss relevant aspects of the role of prediction in economics i the problem of

prediction as a test for a science ii the general orientation in methodology of science and the problem of prediction as a scientific test iii the methodological framework of social sciences and economics incidence for prediction as a test iv epistemology and methodology of economic prediction rationality and empirical approaches and v methodological aspects of economic prediction from description to prescription thus the book is of interest for philosophers and economists as well as policy makers seeking to ascertain the roots of their performance the style used lends itself to a wide audience
