at a time of increased interest and renewed shock over the tuskegee syphilis experiments acres of skin sheds light on yet another dark episode of american medical history in this disturbing expose allen m hornblum tells the story of philadelphia s holmesburg prison

in the past 30 years the population of prisoners in the united states has expanded almost 5 fold

correctional facilities are increasingly overcrowded and more of the country's disadvantaged populations racial minorities women people with mental illness and people with communicable diseases such as hiv aids hepatitis c and tuberculosis are under correctional supervision because prisoners face restrictions on liberty and autonomy have limited privacy and often receive inadequate health care they require specific protections when involved in research particularly in today's correctional settings given these issues the department of health and human services office for human research protections commissioned the institute of medicine to review the ethical considerations regarding research involving prisoners the resulting analysis contained in this book ethical considerations for research involving prisoners emphasizes five broad actions to provide prisoners involved in research with critically important protections expand the definition of prisoner ensure universally and consistently applied standards of protection shift from a category based to a risk benefit approach to research review update the ethical framework to include collaborative responsibility and enhance systematic oversight of research involving prisoners

in the name of progress the dark side of medical research is a comprehensive exploration of the dark side of medical progress examining a series of unethical medical experiments conducted over the past century this book delves into notorious cases like the tuskegee syphilis study the guatemala syphilis experiment and the holmesburg prison experiments among others to shed light on the ethical violations and exploitation that occurred under the guise of scientific advancement each chapter methodically uncovers the disturbing details of these studies analyzing the impact on the victims and the long term effects on public trust and medical ethics by providing a critical examination of the ethical breaches in historical medical research this book emphasizes the importance of informed consent the protection of vulnerable populations and the need for stringent ethical standards in medical studies it aims to educate and provoke thoughtful discussion on the balance between scientific discovery and ethical conduct highlighting the necessity of safeguarding human rights in medical research and the importance of maintaining ethical integrity in the pursuit of scientific knowledge

this engaging book presents a critical approach to understanding prison conditions in the united states in the era of mass incarceration fleury steiner and longazel do this by weaving together empirical research on prisons with stories that rely on the voices and lived experiences of people who are locked up this is an ideal book for courses in corrections social problems criminology and prisoner re entry the new edition of the pains of mass imprisonment dramatically expands and

revises the previous edition to include more empirical data significant engagement with current debates and scholarship and extended pedagogical and learning materials

this textbook provides a brief history of human experimentation and reviews various theories of ethics from which the principles and rules that govern this research are derived all relevant international documents and national regulations policies and memoranda are referred to extensively to assist in addressing issues that regularly arise during the course of research involving human subjects it includes case examples and exercises and is of interest to students and experienced researchers

the story of the holmesburg trials was documented by allen hornblum in his 1998 book acres of skin the more general history of african americans as human guinea pigs has most recently been told by harriet washington in her 2007 book medical apartheid the subject is currently a topic of heated public debate in the wake of a 2006 report from an influential panel of medical experts recommending that the federal government loosen the regulations in place since the 1970s that have limited the testing of pharmaceuticals on prison inmates

as new medical technologies and treatments develop with increasing momentum the legal and ethical implications of research involving human participants are being called into question as never before human experimentation and research explores the philosophical foundations of research ethics ongoing regulatory dilemmas and future challenges raised by the rapid globalisation and corporatisation of the research endeavour this volume brings together some of the most significant published essays in the field the editors also provide an informative introduction summarizing the area and the relevance of the articles chosen

praised by instructors and students alike program evaluation an introduction helps your students evaluate services and programs using scientifically credible research tools in the process of learning these evaluation techniques and skills they will also become proficient at critically analyzing evaluation studies conducted by others the authors present and simplify all the essentials needed for a critical appreciation of evaluation issues and methodology from this text students will learn how to gather evidence and demonstrate that their interventions and programs are effective in improving clients lives this text is known for its student friendly writing style and clear presentation of concepts as well as its hands on and applied focus

this text presents a carefully selected group of readings on medical history and development that allow students to evaluate primary sources test the interpretations of distinguished historians and draw their own conclusions

introduces students to a wide range of law related activities with selected materials that are instructive for lawyers judges and legislators and other counselors adjudicators and rulemakers part i is a brief conceptual analysis of the nature of the new biology and of theories for evaluating its importance its continued development and its applications a discussion of technology assessment is included as part of this review includes analyses of what would count as reasons for various uses of technology e g therapeutic justifications for use of behavior control technologies

this guidebook is filled with valuable information on the role and responsibilities of a clinical research coordinator crc and explains the research process from the site and crc perspective topics covered include identifying the regulations governing clinical research describing the drug development process discussing good clinical practices and how to apply them in clinical trials and organizing a clinical practice

classic in its field this best selling text teaches general research methods using standard and contemporary examples of both qualitative and quantitative research in criminal justice and criminology
