about 550 registrants from 51 different countries attended the seventh ottawa conference on medical education and assessment in maastricht we received 525 abstracts for the conference divided in thematic poster sessions and

platform presentations organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous ottawa conferences during and after the conference about 250 papers were submitted for publication in the conference proceedings leaving us little time for a post conference depression despite the large number of papers the editors have attempted to review and edit the papers as care fully as possible occasionally however correspondence exceeded reasonable deadlines preventing careful editing of a small number of the papers although we felt that our editorial task was not quite finished we nevertheless decided to include these papers we thank the many authors for their enthusiastic and prompt response to occasionally tedious editorial suggestions and requests we are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education the editors want to thank jocelyn flipppo berger whose expertise with desk top publishing and perseverance was a great help

fully updated for a second edition the oxford handbook of pre hospital care is the invaluable guide to providing high quality care in a pre hospital environment evidence based and reflecting new developments in regulation and practice this second edition is designed to provide key information for all immediate care practitioners including doctors paramedics emergency medical technicians and community responders the text has been cross referenced with the joint royal colleges ambulance liaison committee jrcalc handbook to ensure full clinical relevance reflecting the major advances in delivery of pre hospital care including the greater survival benefits for heart attacks and major trauma when delivering patients directly to higher levels of care the evolution of the paramedic role into critical care paramedics roadside rapid sequence induction of anaesthesia and the introduction of mechanical chest compression devices this new edition is the ideal companion for those involved in delivering pre hospital care it also links to relevant online databases and mobile apps that can assist with calculations and contains key algorithms and formulae to ensure good care the oxford handbook of pre hospital care is the comprehensive quick reference guide to all medical and trauma conditions regularly encountered in the immediate care setting

simulation facilities are invaluable for training in medicine and clinical education biomedical engineering and life sciences they allow the practice of prevention containment treatment and procedure in a risk free setting this book is a practical guide and reference to the latest technology operations and opportunities presented by clinical simulation it shows how to develop and make efficient use of resources and provides hands on information to those

tasked with setting up and delivering simulation facilities for medical clinical and related purposes and the development and delivery of simulation based education programs a step by step manual to developing successful simulation programs shows how to design construct outfit and run simulation facilities for clinical education and research the residency review committee of the us accreditation council on graduate medical education has begun requiring residency programs to have simulation as an integral part of their training programs

we are delighted to present the inaugural frontiers in cardiovascular medicine women in cardiovascular epidemiology and prevention series of article collections at present less than 30 of researchers worldwide are women long standing biases and gender stereotypes are discouraging girls and women away from science related fields and stem research in particular science and gender equality are however essential to ensure sustainable development as highlighted by unesco in order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue stem careers therefore frontiers in cardiovascular medicine is proud to offer this platform to promote the work of women scientists across all fields of basic and clinical cardiovascular medicine the work presented here highlights the diversity of research performed across the entire breadth of cardiovascular epidemiology and prevention research and presents advances in theory experiment and methodology with applications to compelling problems
