this comprehensive six volume collection addresses all aspects of online and distance learning including information communication technologies applied to education virtual classrooms pedagogical systems based learning library information systems virtual universities and more it enables libraries to provide a foundational reference to meet the information needs of researchers educators practitioners administrators and other stakeholders in online and distance learning provided by publisher

describes a systematic approach to reducing time to proficiency the book is divided into three sections 1 the learning path methodology which walks the reader through the major steps and strategies needed for building learning paths 2 doing the right training the reader is presented with a wide range of strategies methods and techniques that can be targeted to the training within a learning path and tied to an organization s particular business needs 3 do the training right in conclusion shows how to ensure the training within a learning path is delivered in the most cost effective manner and introduces methods for structuring training so that it transfers to the job easily and effectively

this encyclopedia offers the most comprehensive coverage of the issues concepts trends and technologies of distance learning more than 450 international contributors from over 50 countries provided by publisher

one stop shopping for all the latest information literature and resources needed by trainers the yearbook features the best full length articles from leading publications plus abstracts of hundreds of other articles the trainers almanac is a unique yellow pages guide to professional organizations conferences sources software reference books journals and newsletters

i found the book excellent and read every one of the 450 pages many of the chapters reflect the fielding institute s focus on human and organizational behaviour educational leadership and organizational management the book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book there are many books and articles about online learning this is one of the better ones robin mason computers and education technology mediated instruction has taken the university and the corporate sector by storm as more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy this handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so the editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn the transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning features benefits part i provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues part ii examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments the book draws heavily on personal case examples many from the fielding graduate institute s 26 years of teaching in nontraditional distributed learning environments

this monograph focuses on the research on online learning it is oriented toward exploring the specific intricacies of learning over the some very good studies of online learning using the are reviewed the chapters are 1 the explosion of distance education 2 the significance of no significance 3 research basics 4 research on technology and students 5 research on faculty and institutions 6 the pursuit of guidelines and 7 advice to the confused contains 1 figure 1 table and 311 references sld
