due to the adverse outcomes of the recent global recession and the public deficit crisis in the USA and Europe, Western companies can expect flattening or declining sales in their domestic markets. They will also face growing competition as Chinese firms seek to block the activities of foreign companies in their domestic market and expand their own operations in overseas markets. Survival and growth for Western companies is unlikely to come from sustaining current business practices based upon utilization of conventional approaches. Strategic management success will depend on exploiting new knowledge to stay ahead of competition. This book examines the strategic issues associated with the entrepreneurial utilization of new knowledge to create innovative products and services accompanied by the development of leading edge, highly productive internal organizational processes through the use of appropriate theories and illustrative case examples. The text is designed to assist managers in Western organizations and business school students understand how to counter the increasing threats that are posed by the globalization of companies from emerging countries such as the BRIC nations.

Since the spread of COVID-19, conferences have been canceled, schools have closed, and libraries around the world are facing difficult decisions on which services to offer and how, ranging from minimal restrictions to full closures depending on the country, state, or city. A government may have a different approach, sometimes ordering the closure of all institutions, others indicating that it's business as usual, and others simply leaving decisions up to library directors. All libraries worldwide have been affected, from university libraries to public library systems and national libraries. Throughout these closures, libraries continue to provide services to their communities, which has led to an emerging area of research on library services, new emerging technologies, and the advancements made to libraries during this global health crisis. The handbook of research on library response to the COVID-19 pandemic consists of chapters that contain essential library services and emerging research and technology that evolved and/or has continued during the COVID-19 pandemic, as well as the challenges and opportunities that have been undertaken. As a result, the chapters provide in-depth research, surveys, and information on areas such as remote working, machine learning, data management, and the role of information during COVID-19. This book is a valuable reference tool for practitioners, stakeholders, researchers, academicians, and students who are interested in the current state of libraries during a pandemic and the future outlook.
