since the 1950s under congressional mandate the u s national science foundation nsf  
through its national center for science and engineering statistics ncses and predecessor  
agencies has produced regularly updated measures of research and development  
expenditures employment and training in science and engineering and other indicators of  
the state of u s science and technology a more recent focus has been on measuring  
innovation in the corporate sector ncses collects its own data on science technology and  
innovation sti activities and also incorporates data from other agencies to produce  
indicators that are used for monitoring purposes including comparisons among sectors  
regions and with other countries and for identifying trends that may require policy  
attention and generate research needs ncses also provides extensive tabulations and  
microdata files for in depth analysis capturing change in science technology and  
innovation assesses and provides recommendations regarding the need for revised  
refocused and newly developed indicators of sti activities that would enable ncses to  
respond to changing policy concerns this report also identifies and assesses both existing  
and potential data resources and tools that ncses could exploit to further develop its  
indicators program finally the report considers strategic pathways for ncses to move  
forward with an improved sti indicators program the recommendations offered in  
capturing change in science technology and innovation are intended to serve as the basis  
for a strategic program of work that will enhance ncses s ability to produce indicators  
that capture change in science technology and innovation to inform policy and optimally  
meet the needs of its user community
