A problem-based approach for management education describes the use of problem-based learning (PBL) in management education. PBL is an active learning approach first pioneered in medical education but whose use has grown steadily in a variety of professional fields over the past two decades. The authors draw upon their experience in using PBL in a broad array of management education programs at the bachelor, master, doctoral, and executive levels in North America and in Asia. This book is designed to provide both novice and experienced users of PBL with resources for designing and implementing problem-based management education. The book provides the novice with useful theoretical and practical background on how to design a PBL curriculum, use PBL in a classroom, and develop PBL materials. At the same time, the book will challenge experienced users of PBL and case teaching to extend their applications through the use of learning technologies and more systematic approaches to assessment and curriculum design.
