in 1977 the sixty nine year old czech philosopher jan patočka died from a brain hemorrhage following a series of interrogations by the czechoslovak secret police a student of husserl and heidegger he had been arrested along with young playwright václav havel for publicly opposing the hypocrisy of the czechoslovak communist regime patočka had

dedicated himself as a philosopher to laying the groundwork of what he termed a life in truth this book analyzes patočka's philosophy and political thought and illuminates the synthesis in his work of socratic philosophy and its injunction to care for the soul in bridging the gap not only between husserl and heidegger but also between postmodern and ancient philosophy patočka presents a model of democratic politics that is ethical without being metaphysical and transcendental without being foundational

sklansky traces a shift in american social thought as the gradual demise of the household economy rendered proprietary independence an increasingly embattled ideal amid the widening class divide nineteenth century social theorists devised a new science of american society that reconceived freedom in terms of psychic self expression instead of economic self interest and they redefined democracy in terms of cultural kinship rather than social compact

do we all possess a soul if so what is it can it be defined crawford argues that it is important that we have a soul because if it is immortal then we can hope for life after death but some religions insist that it is the resurrection of the body which is vital how can the belief in an immortal soul and resurrection of the body be reconciled crawford attempts to answer this question in the context of six world religions and the science and technology of twenty first century society

polemon of laodicea near modern denizli south west turkey was a wealthy greek aristocrat and a key member of the intellectual movement known as the second sophistic among his works was the physiognomy a manual on how to tell character from appearance thus enabling its readers to choose friends and avoid enemies on sight its formula of detailed instruction and personal reminiscence proved so successful that the book was re edited in the fourth century by adamantius in greek translated and adapted by an unknown latin author of the same era and translated in the early middle ages into syriac and arabic the surviving versions of adamantius anonymus latinus and the leiden arabic more than make up for the loss of the original the present volume is the work of a team of leading classicists and arabists the main surviving versions in greek and latin are translated into english for the first time the leiden arabic translation is authoritatively re edited and translated as is a sample of the alternative arabic polemon the texts and translations are introduced by a series of masterly studies that tell the story of the origins function and legacy of polemon's work a

legacy especially rich in islam the story of the physiognomy is the story of how one man s obsession with identifying enemies came to be taken up in the fascinating transmission of greek thought into arabic

monte johnson examines one of the most controversial aspects of aristotle s natural philosophy his teleology is teleology about causation or explanation does it exclude or obviate mechanism determinism or materialism is it focused on the good of individual organisms or is god or man the ultimate end of all processes and entities is teleology restricted to living things or does it apply to the cosmos as a whole does it identify objectively existent causes in the world or is it merely a heuristic for our understanding of other causal processes johnson argues that aristotle s aporetic approach drives a middle course between these traditional oppositions and avoids the dilemma frequently urged against teleology between backwards causation and anthropomorphism although these issues have been debated with extraordinary depth by aristotle scholars and touched upon by many in the wider philosophical and scientific community as well there has been no comprehensive historical treatment of the issue aristotle is commonly considered the inventor of teleology although the precise term originated in the eighteenth century but if teleology means the use of ends and goals in natural science then aristotle was rather a critical innovator of teleological explanation teleological notions were widespread among his predecessors but aristotle rejected their conception of extrinsic causes such as mind or god as the primary causes for natural things aristotle s radical alternative was to assert nature itself as an internal principle of change and an end and his teleological explanations focus on the intrinsic ends of natural substances those ends that benefit the natural thing itself aristotle s use of ends was subsequently conflated with incompatible teleological notions including proofs for the existence of a providential or designer god vitalism and animism opposition to mechanism and non teleological causation and anthropocentrism johnson addresses these misconceptions through an elaboration of aristotle s methodological statements as well as an examination of the explanations actually offered in the scientific works
