from the author of the highly acclaimed teenagers with add comes a new book especially for teachers of teenagers with attention deficit disorder this book contains concise summaries of over fifty key issues related to add and school success from understanding the basics of add to using effective interventions everything a teacher needs to know is included in this book busy teachers and administrators will appreciate the ease of using this quick reference parents who see their children struggling can use this book at home especially when faced with homework difficulties and to help to co ordinate efforts with teachers particularly helpful for the home school partnership are the many blank forms and checklists suitable for photocopying an invaluable tool this book gives teachers what they need to know in order to support their students and help them to succeed in school

this reservoir engineering textbook is a contemporary analysis of primary recovery it covers rock and fluid properties reservoir energies surface separation laboratory pvt methods material balance fluid flow well deliverability water influx reservoir performance and decline curve analysis using an unified approach the text includes the full range of reservoir fluids black oils volatile oils gas condensates wet gases and dry gases it also covers the entire range of producing mechanisms including gas cap water drive and compaction drive reservoirs

this volume opens with a keynote lecture by rodney ewing member of the board of radioactive waste management of the national research council ewing summarizes 25 years of materials research in nuclear waste emphasizing the progress that has been made and the challenges that still confront investigators and technologists in materials science and repository performance evaluation the session is followed by one on container materials and engineered barriers and includes a discussion on the corrosion performance expected for waste packages in the proposed high level nuclear waste repository at yucca mountain nevada invited papers on performance assessment and repository studies for different national programs are also highlighted with representation from the united states sweden japan belgium switzerland italy and the united kingdom a large number of papers focus on the structure properties and degradation of various waste forms such as glasses ceramics mostly for plutonium immobilization cements and spent nuclear fuel for the second consecutive time the number of papers on ceramics far exceeds those on glass which had been the dominant material discussed at this symposium over the prior 23 years new studies on zirconates confirm

the recently discovered high radiation damage resistance of this material additional topics include performance assessment in high level waste disposal performance assessment in low level waste disposal ceramic structure and corrosion radiation effects in ceramics glass structure and corrosion spent fuel spent fuel cladding and alternative waste forms cements in radioactive waste immobilization contaminant transport natural analogs and waste processing

management information systems are rapidly finding applications in many areas including environmental conservation economic planning resource integration cartography urban planning and risk assessment this volume features papers presented at the fourth international conference on this topic
