this is the seventh and final volume in this comprehensive guide to the history of world cultures throughout historical times

in subsurface history of humanity direction of history victor torvich gives a sweeping overview of global humankind s history for the last 44 thousand years the book will help you to make sense of human history victor torvich found the objective direction of the history of humankind how fast humankind is moving in the found direction is that move controllable by humans why humans rule the earth which force is driving humanity s development these are other questions torvich answers in his wide ranging book torvich looks at history from a viewpoint of a precise science insights from his scientific papers on the complex system of humanity helped him to find out where mankind is headed the book concludes with a discussion of which circumstances could shortly lead us off the uncovered course

analyzes both the social and biological evolution of humans from the spoken language to today s institutions

instant new york times bestseller a dramatically new understanding of human history challenging our most fundamental assumptions about social evolution from the development of agriculture and cities to the origins of the state democracy and inequality and revealing new possibilities for human emancipation for generations our remote ancestors have been cast as primitive and childlike either free and equal innocents or thuggish and warlike civilization we are told could be achieved only by sacrificing those original freedoms or alternatively by taming our baser instincts david graeber and david wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of european society posed by indigenous observers and intellectuals revisiting this encounter has startling implications for how we make sense of human history today including the origins of farming property cities democracy slavery and civilization itself drawing on pathbreaking research in archaeology and anthropology the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what s really there if humans did not spend 95 percent of their evolutionary past in tiny bands of hunter gatherers what were they doing all that time if agriculture and cities did not mean a plunge into hierarchy and domination then what kinds of social and economic organization did they lead to the answers are often unexpected and suggest that the course of human history may be less set in stone and more full of playful hopeful possibilities than we tend to assume the dawn of

everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom new ways of organizing society this is a monumental book of formidable intellectual range animated by curiosity moral vision and a faith in the power of direct action includes black and white illustrations

this book deals with historical events and periods between 3000 bc and 700 bc and new cultural social and political structures which announced or opened new paths in history it is divided into 2 sections the first thematic the second geographical

from a famous historian comes a new tale of humanity s origin and development it investigates the ways in which biology and history have shaped us and increased our knowledge of what it is to be human a profoundly new vision of human history questioning our most basic beliefs about social evolution from the rise of agriculture and cities to the beginnings of the state democracy and inequality and offering fresh possibilities for human liberation drawing on pathbreaking studies in archaeology and anthropology the authors illustrate how history becomes a lot more exciting place if we learn to cast off our mental shackles and observe what s truly there if humans did not spend 95 percent of their evolutionary history in little bands of hunter gatherers what were they doing all that time if agriculture and cities did not imply a fall into hierarchy and dominance then what sorts of social and economic structure did they lead to the replies are sometimes surprising and imply that the trajectory of human history may be less fixed in stone and fuller of playful optimistic possibilities than we prefer to imagine the story of humankind significantly affects our view of the human past and gives a road for creating new kinds of freedom new methods of structuring society this is a huge work of great intellectual breadth propelled by curiosity moral vision and a trust in the power of direct action

the intention of a hidden history of humanity project is to reestablish the correct chronology and timelines for human history that s part of it the other part of of it is that humanity is disempowered and not knowing its true origins or all indeed the chronology so to establish the correct chronology and the understanding of the root races how humanity came into being and how the evolution of consciousness perceived from there is going to empower humanity with knowing the truth humanity has is having the truth hidden from it at this point in time but it is actually emerging we have light emerging we have truth emerging and this is happening exoteric li in parallel with this esoteric emergence of of the ageless wisdom teachings the possibility of discovering and understanding the origin of the human soul and it s divine pedigree is imminent in

our time we stand before a doorway leading to planetary illumination upon the greatest mysteries of life the hidden history of humanity this book focuses on the evolution of consciousness over millions of years reveals the secret chronology of human history from ancient lemuria and atlantis to our current roots while following the natural periodic delusions of races evolution will be traced back to the emergence of the human race in several stages and it reveals a variety of cultures including the atlantis the bodes and the indians from the religious angle some of the most ancient works will be referenced in the hindu jewish persian islamic buddhist gnostic celtic and christian traditions

volume v of the history of humanity is concerned with the early modern period the sixteenth seventeenth and eighteenth centuries it gives an extensive overview of this crucial stage in the rise of the west as well as examining the development of cultures and societies elsewhere structure the volume is divided into two main parts the first is thematic discussing the geography chronology and sociology of cultural change in this period the second is regional less theoretical and more empirical it stresses cultural diversity the links between different activities in a given region and the importance of social contexts and local circumstances each chapter has a bibliography which directs the reader to sources of further information the volume is extensively illustrated with line drawings and plates and is comprehensively indexed

this book is a study of modern politics from a socialist and left wing perspective as a collection of essays on political ideas it presents an analysis of the crisis of our times through examining the various crises and problems which define modern society it considers individual political aspects of the contemporary problems of capitalist politics ranging from economic crisis to social crisis from imperialism to the environmental crisis as such it serves to outline a solid argument for a better politics today the politics of socialism and democratic socialism

a great historian can make clear the connections between the first homo sapiens and today s version of the species and a great storyteller can make those connections come alive david christian is both and this fleeting world a short history of humanity makes the journey from the earliest foraging era to the agrarian era to our own modern era a fascinating one ready to help your students give up their preconceptions that anything old is probably boring enter this fleeting world from publisher description

this fourth edition has been wholly rewritten and restructured while retaining its wealth of information about the founding figures of sociology it also includes much new

material on contemporary social theory and particularly the challenge to sociology posed by the rise of post structuralism with its questioning of the whole enlightenment project new features include a concise introduction to the major debates of the twentieth century information on thinkers of the nineteenth and early twentieth century whose relevance to modern social thought is only now being recognised e g nietszche saussure simmel key debates placed in historical and philosophical context connections drawn between post structuralist thinkers like foucault and derrida and the founding figures of sociology marx weber and durkheim easy to read format four wholly new chapters tracing developments in social theory from structuralism to postmodernism

thrilling a bracing summary of what we have learned from archaeogenetics the study of ancient dna krause and trappe capture the excitement of this young field kyle harper the wall street journal johannes krause is the director of the max planck institute for evolutionary anthropology and a brilliant pioneer in the field of archaeogenetics archaeology augmented by dna sequencing technology which has allowed scientists to reconstruct human history reaching back hundreds of thousands of years before recorded time in this surprising account krause and journalist thomas trappe rewrite a fascinating chapter of this history the peopling of europe that takes us from the neanderthals and denisovans to the present we know now that a wave of farmers from anatolia migrated into europe 8 000 years ago essentially displacing the dark skinned blue eyed hunter gatherers who preceded them this anatolian farmer dna is one of the core genetic components of people with contemporary european ancestry archaeogenetics has also revealed that indigenous north and south americans though long thought to have been east asian also share dna with contemporary europeans krause and trappe vividly introduce us to the prehistoric cultures of the ancient europeans the aurignacians innovative artisans who carved flutes and animal and human forms from bird bones more than 40 000 years ago the varna who buried their loved ones with gold long before the pharaohs of egypt and the gravettians big game hunters who were europe s most successful early settlers until they perished in the ice age genetics has earned a reputation for smuggling racist ideologies into science but cutting edge science makes nonsense of eugenics and pure bloodlines immigration and genetic exchanges have always defined our species who we are is a question of culture not biological inheritance this revelatory book offers us an entirely new way to understand ourselves both past and present

the book that changed my life a constant companion bill bailey extraordinary and beautiful the most exciting and ambitious work of non fiction i have read in more than a decade the daily telegraph this extraordinarily wide ranging study looks at the dilemmas of life today and shows how they need not have arisen portraits of living people

and historical figures are placed alongside each other as zeldin discusses how men and women have lost and regained hope how they have learnt to have interesting conversations how some have acquired an immunity to loneliness how new forms of love and desire have been invented how respect has become more valued than power how the art of escaping from one's troubles has developed why even the privileged are often gloomy and why parents and children are changing their minds about what they want from each other
