international encyclopedia of human geography second edition fourteen volume set embraces diversity by design and captures the ways in which humans share places and view differences based on gender race nationality location and other factors in other words the things that make people and places different questions of for example politics economics race relations and migration are introduced and discussed through a geographical lens this updated edition will assist readers in their research by providing factual information historical perspectives theoretical approaches reviews of literature and provocative topical discussions that will stimulate creative thinking presents the most up to date and comprehensive coverage on the topic of human geography contains extensive scope and depth of coverage emphasizes how geographers interact with understand and contribute to problem solving in the contemporary world places an emphasis on how geography is relevant in a social and interdisciplinary context

gerhard mercator 1512 1594 was the most important cartographer and globemaker of the 16th century he is particularly remembered for his publication atlas sive cosmographicae meditationes de fabrica mundi et fabricati figura 1595 and for his specific cylindrical map projection 1569 which is still used widely today this book brings together the latest research on mercator with a view to his sources and his relationships with other scientific disciplines and cartographers of his time as well as his role in the wider worlds of renaissance cartography

and humanism

the core of this book is an atlas of the rat brain viewed from 73 representative transverse levels along its longitudinal axis new to this edition is a second drawing of gray and white matter distribution that illustrates major features of gray matter regionalization in a color coded way that is carried through the flatmaps of the rat CNS and the hierarchical nomenclature tables computer graphics files of the atlas and flatmaps are provided on the CD-ROM they can be used to learn more about the structure of the brain to map experimental results on standard or reference templates to form databases of spatial information about the rat brain and to create 3D models

the interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields a research guide to cartographic resources navigates the numerous American and Canadian cartographic resources available in print and online offering researchers academics and students with information on how to locate and access the large variety of resources new and old dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations a research guide to cartographic resources consists of 18 chapters two appendices and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work of the type of material required to meet the information needs of those interested in researching place specific cartographic related resources additionally this guide will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level this volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets

the German naturalist and explorer chronicles his 1799 expedition to central and south America in this classic work of natural history while the influence of Alexander von Humboldt 1769-1859 looms large over the natural sciences his legacy reaches far beyond the field notebooks of naturalists Humboldt's 1799-1804 research expedition to central and south America with botanist Aimé Bonpland not only set the course for the great scientific surveys of the nineteenth century but also served as the raw material for his many volumes works of both scientific rigor and aesthetic beauty that inspired such essayists and artists as Emerson Goethe Thoreau Poe and Frederic Edwin Church *Views of Nature* or *Ansichten der Natur* was Humboldt's best known and most influential work and his personal favorite while the essays that comprise it are themselves remarkable as innovative early pieces of nature writing they were cited by Thoreau as a model for his own work the book's extensive endnotes incorporate some of Humboldt's most beautiful prose and mature thinking on vegetation structure its origins in climate patterns and its implications for the arts written for both a literary and a scientific audience *Views of Nature* was translated into English twice Spanish and French in the nineteenth century and it was read widely in Europe and the Americas but in contrast to many of Humboldt's more technical works *Views of Nature* has been unavailable in English for more than one hundred years largely neglected in the United States during the twentieth century Humboldt's contributions to the humanities and the sciences are now undergoing a revival to which this new translation will be a critical contribution praise for *Views of Nature* Alexander von Humboldt's wide ranging *Views of Nature* is a masterpiece of nineteenth century natural history at once science and art Mark W. Peterson's stunning new translation makes the wonders of this classic accessible to the English language world of the present Daniel Walker Howe author of the Pulitzer Prize winning *What Hath God Wrought* from the plains of Venezuela to volcanoes and waterfalls von Humboldt combines observations with travel narratives and philosophical musings annotations really help provide a context to the essays this work also includes an index conversions for von Humboldt's various measurement units an introduction and preface this excellent translation of one of von Humboldt's most important works should introduce this great naturalist to an entirely new audience Edward J. Valauskas curator of rare books library Chicago Botanic Garden current books on gardening and botany

this collection of maps of distribution of breeding birds in alberta is arranged by order and family each map shows evidence of nesting confirmed probable possible observed with description and illustration of the bird extensive bibliography index of bird names in english latin and french and list of migrants

now in a new seventh edition this volume remains one the finest top of the line atlases available with hundreds of stunning full color large format maps produced by europe s finest cartographers

the volume also contains late essays on growing up in houston writing from life and illness and recovery jacket
