simple but beautifully versatile perhaps not a description many would choose for hydrogen peroxide but an accurate one none the less and this unique book explains the reasons behind the description beginning with an historical overview and guidelines for the safe handling of peroxygens applications of hydrogen peroxide and derivatives goes on to cover key activation mechanisms organic functional group oxidations and the use of hydrogen peroxide with heterogeneous catalysts the clean up of environmental pollutants chemical purification and extraction of metals from their ores are also discussed in detail using actual examples from industry the versatility of this reagent may well prove to be a key to integrated pollution control in the future this book should therefore be read by academics and industrialists at all levels to encourage wider applications of the use of hydrogen peroxide in laboratories

textile chemical processing today particularly the pre treatment processes require a highly sophisticated technology and engineering to achieve the well known concepts of right first time right everytime and right on time processing and production chemical pre treatment may be broadly defined as a procedure mainly concerned with the removal of natural as well as added impurities in fabric to a level necessary for good whiteness and absorbency by utilising minimum time energy and chemicals as well as water this book discusses the fundamental aspects of chemistry chemical technology and machineries involved in the various pre treatment process of textiles before subsequent dyeing printing and finishing with the introduction of newer fibres specialty chemicals improved technology and sophisticated machineries developed during the last decade this book fills a gap in this area of technology however its real strength is its clear perception of ample background description which will enable readers to understand most current journals thus staying abreast of the latest advances in the field
