this fourth edition gives an accessible introduction to the java language and a grounding in the fundamental computer science concepts it includes expanded coverage of graphical user interfaces guis and applets as well as updated examples and exercises

urban riverbanks are attractive locations and highly prized recreational environments the designs of

urban river landscapes must fulfill a broad range of requirements flood control open space design and ecology are as a rule the three dominant themes and they must often be reconciled within a very restricted space the river must be understood as a process governed by changing water levels shifting seasons erosion and sedimentation the river environment is not a static entity but constantly changing the design must be flexible and take this into account this book is the product of a multi year study that subjected more than fifty western european projects to a comparative analysis the result is a systematic catalog of effective strategies and innovative design elements first designers and planners are given an overview of the broad and varied spectrum of design possibilities the book s process oriented approach is especially helpful where the focus is on long term sustainable measures the publication consists of two linked volumes that enable the reader to consult the systematic catalog and the case study section side by side the easy to navigate structure and an extensive glossary provide further guidance while the work s highly distinctive design makes it visually appealing as well and invites the reader to leaf through and explore it

this edition of horstmann s bestselling text helps you absorb computing concepts and programming principles develop strong problem solving skills and become a better programmer all while exploring the elements of java that are needed to write real life programs

this reference work presents the state of the art in the field of click chemistry collecting the most useful practical and reliable methods click chemistry is a discipline that has grown rapidly since the introduction of this term by barry sharpless and huisgen approximately two decades ago initially click reactions mostly involved copper catalyzed azide alkyne cycloadditions and their applications to connect molecules but gradually new types of click reactions were developed which also allowed a much wider range of applications throughout the chemical biological and materials sciences this volume provides an overview of the most widely used click reactions and their scope and limitations written by pioneers and leaders in the field and including representative applications and experimental procedures newcomers to the field are enabled to instantly apply these reactions in synthesis
