the audience remains much the same as for the 1992 handbook namely
 mathematics education researchers and other scholars conducting work in
 mathematics education this group includes college and university faculty
 graduate students investigators in research and development centers and staff
 members at federal state and local agencies that conduct and use research within
 the discipline of mathematics the intent of the authors of this volume is to provide
 useful perspectives as well as pertinent information for conducting investigations
 that are informed by previous work the handbook should also be a useful textbook
 for graduate research seminars in addition to the audience mentioned above the
 present handbook contains chapters that should be relevant to four other groups
 teacher educators curriculum developers state and national policy makers and
 test developers and others involved with assessment taken as a whole the
 chapters reflects the mathematics education research community's willingness to
 accept the challenge of helping the public understand what mathematics
