despite the dynamic development of the discipline of economics the ways in which economics is taught and how it defines its basic principles have hardly changed resulting in economics being criticised for its inability to provide relevant insights on global challenges in response this book defines new principles of economics and seeks to establish economics as the science of markets a new principles of economics provides an alternative conceptual framework for the study of economics integrating recent developments and research in both economics and neighbouring social sciences adopting the structure of a standard principles text it separates the study of markets as mechanisms and markets in their wider contexts in

doing so a number of new perspectives are introduced including approaching the economy as part and parcel of the earth system directly connecting the analysis of production with an analysis of technology and thermodynamic principles explicitly treating markets as forms of social networks mediated by the institution of money and reinstating the central role of distribution in political economy analysis drawing on the latest theories and research on the economy and including both the natural and social sciences this text provides a holistic introduction suitable for postgraduates and other advanced students

various strains of heterodox economics have sought and largely failed to dismount orthodoxy from its dominant position this book critiques the critics explaining why heterodox economics challenges have faltered and then presents a coherent alternative paradigm of its own this simultaneously exposes the vacuousness of neoclassical economics the limitations of heterodox critique and the subverting of karl marx's revolutionary economic thought by his own disciples the book draws in particular on two key intellectual traditions in making its arguments critical realism and marxism from the refounding of critical realist philosophy of science in the hands of roy bhaskar emphasis is placed upon the position that the ontological nature of the object of study determines the form of its possible science however in their theoretical constructions neither orthodox economics nor heterodox economics problematizes the unique ontology of capitalism to the detriment of knowledge about the social world the book maintains that a century of misthinking over marx's corpus has resulted in a missed opportunity to construct a paradigmatic alternative to orthodox economics drawing upon the tradition of the japanese uno approach to marxism and supported by bhaskar's development of critical realism as underlaborer for science the book defends marx's writing in his monumental capital as founding an economic science adequate to its ontological object of study it then elaborates upon how marxian economic theory exposes the hidden scourges of capitalism and what is required to unleash the potential of this theory for comprehensive analysis of capitalist vicissitudes the study of economic life in precapitalist societies and the design of a desperately needed postcapitalist social order broadening its appeal as it sets out to reclaim marx's revolutionary legacy this original volume critically traverses writings in mainstream and heterodox economics cutting edge philosophy of science and marxian political economy and introduces readers to a reconstruction of marx's capital engineered in japan this provocative book is essential reading for everyone interested in heterodox economics critical realism marxian economics and critiques of capitalism
