making a decision of any importance is never simple on the one hand specialists in decision theory do not come within the reach of most policy makers and secondly there are very few books on pragmatic decision that are not purely anecdotal in addition there is virtually no book that provides a link between decision making and action this book provides a bridge between the latest results in artificial intelligence neurobiology psychology and decision making for action what is the role of intuition or emotion what are the main psychological biases of which we must be wary how can we avoid being manipulated what is the proper use of planning how can we remain rational even if one is not an expert in probabilities perhaps more importantly for managers how does one go from decision to action so many questions fundamental to the practice of decision making are addressed this book dissects all issues that arise almost daily for decision makers at least for major decisions drawing on numerous examples this book answers in plain language and imagery all your questions the final chapter takes the form of a brief reminder everything you have to remember to be a good decision maker

systems and decision making a management science approach hans g daellenbach university of canterbury christchurch new zealand traditional methods of problem solving based on the cause and effect model can no longer cope with the complex situations in which decisions have to be made today these problem situations occur within a systems context most of these systems are created and controlled by humans and it is therefore important that decision making is guided by a systematic and comprehensive methodology that helps the decision maker to make effective use of his her extensive but limited powers of reasoning systems and decision making combines contemporary systems work with operations research or daellenbach places an emphasis on developing a methodology for decision situations that lend themselves to quantitative approaches rather than give an elementary survey of many or ms techniques it incorporates some of the learnings of soft systems methodology for more practical problem solving particularly at the problem identification and formulation stages the text also shows that the scientific component of modelling can be considerably enhanced by the use of various diagrammatic devices the second part of the book studies a number of topics important for the analyst such as how to deal with the time element with constraints with uncertainty and with multiple goals these are demonstrated by various or ms techniques systems and decision making is an excellent core text for undergraduate and graduate students of systems

management science and mba courses

building on lecture notes from his acclaimed course at stanford university james march provides a brilliant introduction to decision making a central human activity fundamental to individual group organizational and societal life march draws on research from all the disciplines of social and behavioral science to show decision making in its broadest context by emphasizing how decisions are actually made as opposed to how they should be made he enables those involved in the process to understand it both as observers and as participants march sheds new light on the decision making process by delineating four deep issues that persistently divide students of decision making are decisions based on rational choices involving preferences and expected consequences or on rules that are appropriate to the identity of the decision maker and the situation is decision making a consistent clear process or one characterized by ambiguity and inconsistency is decision making significant primarily for its outcomes or for the individual and social meanings it creates and sustains and finally are the outcomes of decision processes attributable solely to the actions of individuals or to the combined influence of interacting individuals organizations and societies march s observations on how intelligence is or is not achieved through decision making and possibilities for enhancing decision intelligence are also provided march explains key concepts of vital importance to students of decision making and decision makers such as limited rationality history dependent rules and ambiguity and weaves these ideas into a full depiction of decision making he includes a discussion of the modern aspects of several classic issues underlying these concepts such as the relation between reason and ignorance intentionality and fate and meaning and interpretation this valuable textbook by one of the seminal figures in the history of organizational decision making will be required reading for a new generation of scholars managers and other decision makers

why do the people in some companies continually dazzle us with their brilliant decisions while those in others make one blunder after another do they understand their businesses better are they just plain smarter or is it all a matter of luck the answer says j frank yates is none of the above the real key rarely recognized is how the leaders manage the company s decision processes the leaders decision management practices drawing on his thirty years of research and experience as well as scholarship from psychology economics statistics strategy medicine and other fields to explain the fundamental nature of business decision problems yates

highlights the ten cardinal decision issues crucial to managing the decision making process and ultimately better company decisions he covers problems ranging from recognizing whether a decision is actually called for to assuring that a preferred course of action will be implemented he shows how solid decisions result when managers ensure that deciders resolve every cardinal issue effectively for every decision problem facing the company he also reveals how conversely chronically poor decisions are traceable to managers allowing or even creating conditions that encourage deciders to fall short in how they address at least one of those critical issues

today s world is complex and getting more so each day huge multinational corporations international crisis and fast breaking events require most people to make decisions on a daily basis without the tools to understand the long term impact that today s decision might create because most people have never really been trained in how to make important complex decisions most people rely on experience and gut reaction which is okay for many decisions but not okay for decision that will have meaningful impact on organizations and individual decision makers need to develop the art and science of strategic decision making here professor thomas martin explains the need for decision makers to modify their thinking about how they deal with acquiring and analyzing information in each of the decision making process steps this approach requiring thinking modification will lengthen the process make it more complex and to some more arduous but the comprehensiveness of the new thinking approach should lead to improved and more effective decision making in this book dr martin presents a thinking modification framework that asserts that in the decision making process there are three situational states a current state future state and a transitional state that one must deliberate in finding a solution for each of these situational states martin develops an identical five step process to determine the best decision to make the steps of this process include change needing situational analysis challenge framing causal analysis generating solution ideas choosing a solution set implementation and aftermath planning this book will appeal to decision makers leaders and students of management who want a specific framework that details the process behind making strategic well informed decisions

using real world examples moody s simple nontechnical descriptions make even the most sophisticated decision techniques easy to grasp and apply includes

descriptions of brainstorming the delphi technique force field analysis utility theory and more 67 illustrations

decisions and problems can often leave people with a dilemma knowing that a decision is required but uncertain how to ensure that it is the best one and that it will be successfully executed the paradox is that the very pressure for a decision often breeds indecisiveness think on your feet addresses this fundamental problem enabling you to find the best solutions and options avoid pitfalls managerisk work with people to ensure that decisions succeed and understand how you can improve the way you typically operate when making decisions

building on lecture notes from his acclaimed course at stanford university james march provides a brilliant introduction to decision making a central human activity fundamental to individual group organizational and societal life march draws on research from all the disciplines of social and behavioral science to show decision making in its broadest context by emphasizing how decisions are actually made as opposed to how they should be made he enables those involved in the process to understand it both as observers and as participants march sheds new light on the decision making process by delineating four deep issues that persistently divide students of decision making are decisions based on rational choices involving preferences and expected consequences or on rules that are appropriate to the identity of the decision maker and the situation is decision making a consistent clear process or one characterized by ambiguity and inconsistency is decision making significant primarily for its outcomes or for the individual and social meanings it creates and sustains and finally are the outcomes of decision processes attributable solely to the actions of individuals or to the combined influence of interacting individuals organizations and societies march s observations on how intelligence is or is not achieved through decision making and possibilities for enhancing decision intelligence are also provided march explains key concepts of vital importance to students of decision making and decision makers such as limited rationality history dependent rules and ambiguity and weaves these ideas into a full depiction of decision making he includes a discussion of the modern aspects of several classic issues underlying these concepts such as the relation between reason and ignorance intentionality and fate and meaning and interpretation this valuable textbook by one of the seminal figures in the history of organizational decision making will be required reading for a new generation of scholars managers and other decision makers

in the second edition of rational choice in an uncertain world the authors compare the basic principles of rationality with actual behaviour in making decisions they describe theories and research findings from the field of judgment and decision making in a non technical manner using anecdotes as a teaching device intended as an introductory textbook for advanced undergraduate and graduate students the material not only is of scholarly interest but is practical as well the second edition includes more coverage on the role of emotions happiness and general well being in decisions a summary of the new research on the neuroscience of decision processes more discussion of the adaptive value of non rational heuristics expansion of the graphics for decision trees probability trees and venn diagrams

should i have this medical treatment or that one is this computer a better buy than that one should i invest in shares or keep my money under the bed we all face a perplexing array of decisions every day thoroughly revised and updated throughout the new edition of straight choices provides an integrative account of the psychology of decision making and shows how psychological research can help us understand our uncertain world straight choices emphasises the relationship between learning and decision making arguing that the best way to understand how and why decisions are made is in the context of the learning and knowledge acquisition which precedes them and the feedback which follows the mechanisms of learning and the structure of environments in which decisions are made are carefully examined to explore their impact on our choices the authors then consider whether we are all constrained to fall prey to cognitive biases or whether with sufficient exposure we can find optimal decision strategies and improve our decision making featuring three completely new chapters this edition also contains student friendly overviews and recommended readings in each chapter it will be of interest to students and researchers in cognitive psychology behavioral economics and the decision sciences as well as anyone interested in the nature of decision making

the insights offered in this book are intended to guarantee the reader a more successful career it is written especially for managers and executives whose jobs require managing people successfully but it is also written for anyone who must make decisions that involve other people the authors discuss the decision styles and habits that people form and how to change decision making habits where necessary the models and techniques for decision making presented here have

been used throughout the world in all kinds of businesses and government agencies decision style concepts can benefit anyone from a new management trainee or mba student to the ceo of a large firm

current directions in the fields of data mining machine learning and decision making the papers are divided in terms of their topic into three sections the first section analysis and modeling of complex systems and processes contains of 26 papers and the second section theoretical and applied aspects of decision making systems contains of 13 papers there are 15 papers in the third section computational intelligence and inductive modeling the book is focused to scientists and developers in the fields of data mining machine learning and decision making systems

mental health professionals routinely make treatment decisions without necessarily having an overarching perspective about optimal next steps this important new book provides them with reader friendly pragmatic strategies to approach clinical problems as testable hypotheses it discusses how to apply concepts based on decision analytic theory using risk benefit analyses contingency planning measurement based care shared decision making pharmacogenetics disease staging and machine learning readers will learn how these tools can help them craft optimal pharmacological and psychosocial interventions tailored to the needs of an individual patient the book covers topics such as diagnostic ambiguity interview technique applying statistical concepts to individual patients artificial intelligence and managing high risk treatment resistant or demanding and difficult patients valuable clinical vignettes are featured throughout the book to illustrate common dilemmas and scenarios where the relative merits of competing treatment options invite a more iterative than definitive approach for all healthcare professionals who prescribe psychotropic medications

making good decisions quickly is what marks out truly great leaders from the rest of us decision making is one of the most sought after skills today but most of us have never been taught but one most of us have never been taught aged 19 i went off piste snowboarding way before i had the skills or experience to do so and very quickly found myself hurtling towards the edge of a cliff face on sheet ice within minutes i was literally hanging onto a boulder for dear life with my legs dangling over the precipice every single decision i made over the next few hours was life or death there were no easy choices each right decision could be undone by a wrong one and i was very aware of how close i was to death the whole time the cold the wind the fading light the fact no one knew where i was the fact i had no food or water on me that day my brain worked overtime to keep me alive what i learned has actually been a enabled me to approach decisions in all

areas of my life with ease in addition to sharing my story with you i will also explore 6 of the best decision making models as well as teach you how to maintain the mindset of a master decision maker after reading this book you ll find making good decisions quick and easy and will no longer waste time stressing over them or avoid stepping up to make them

the analysis of decision making under uncertainty has again become a major focus of interest this volume presents contributions from leading specialists in different fields and provides a summary and synthesis of work in this area it is based on a conference held at the harvard business school the book brings together the different approaches to decision making normative descriptive and prescriptive which largely correspond to different disciplinary interests mathematicians have concentrated on rational procedures for decision making how people should make decisions psychologists have examined how people do make decisions and how far their behaviour is compatible with any rational model operations researchers study the application of decision models to actual problems throughout the aim is to present the current state of research and its application and also to show how the different disciplinary approaches can inform one another and thus lay the foundations for the integrated analysis of decision making the book will be of interest to researchers teachers for use as background reading for a decision theory course students and consultants and others involved in the practical application of the analysis of decision making it will be of interest to specialists and students in statistics mathematics economics psychology and the behavioural sciences operations research and management science

the secret to making the right call in an increasingly complex world the decisions we make every day frequently automatic and incredibly fast impact every area of our lives the little black book of decision making delves into the cognition behind decision making guiding you through the different ways your mind approaches various scenarios you ll learn to notice that decision making is a matter of balance between your rational side and your intuition the trick is in honing your intuition to steer you down the right path pure reasoning cannot provide all of the answers and relying solely on intuition could prove catastrophic in business there must be a balance between the two and the proportions may change with each situation this book helps you quickly pinpoint the right mix of logic and gut feeling and use it to find the best possible solution balance logic and intuition in your decision making approach avoid traps set by the mind s inherent bias understand the

cognitive process of decision making sharpen your professional judgement in any situation decision making is the primary difference between organisations that lead and those that struggle the little black book of decision making helps you uncover errors in thinking before they become errors in judgement

verwhelmed and paralyzed by your choices learn how to get it right the first time improve your analysis judgment and intuition unfortunately you can't just rely on your gut instinct or hunch when you make decisions there's a science to improving your critical thinking weighing pros and cons and avoiding the traps that take you down the wrong path make smart decisions by catching your brain's built-in flaws the art of strategic decision making will teach you to seize control of your life and make sure your decisions aren't making you this book cites years of research and scientific studies about what constitutes a great decision and the factors that will inevitably lead you there it is an in-depth look at human nature and psychology and why we make decisions in the way we do for better or for worse this book is packed with theory but it is all practical and actionable use these mental models and pieces of analysis on your decisions today think more quickly and more thoroughly at the same time peter hollins has studied psychology and the human condition for over a dozen years this book contains tactics pulled from his personal experience as well as some of the most famous studies in decision theory and social psychology to help you make snap decisions beat analysis paralysis and eliminate indecision learn your subconscious motivations needs and desires that hijack your brain discover the surprising causes and cures for decision fatigue over 10 of the most dangerous cognitive biases and decision traps how to make your pros and cons lists incredibly useful and illuminating the 6 hats method of intelligent decisions and how you can inhabit different perspectives the wrap method of planning for failure in decisions how to think outside the box and creatively solve problems
