the analysis includes nonconstant spin rates and inertias and considers the effects of time varying thrust misalignments mass unbalance and jet damping the method was developed for bodies having small transverse angular velocities results are presented in the form of equations for space referenced euler angles flight path angles body referenced attitude rates and earth referenced vehicle trajectory coordinates also equations for maximum wobble have been derived for certain input conditions comparisons with numerical solutions are included for two sample problems

since the early seventies concepts of specification have become central in the whole area of computer science especially algebraic specification techniques for abstract data types and software systems have gained considerable importance in recent years they have not only played a central role in the theory of data type specification but meanwhile have had a remarkable influence on programming language design system architectures and software tools and environments the fundamentals of algebraic specification lay a basis for teaching research and development in all those fields of computer science where algebraic techniques are the subject or are used with advantage on a conceptual level such a basis however we do not regard to be a synopsis of all the different approaches and achievements but rather a consistently developed theory such a theory should mainly

emphasize elaboration of basic concepts from one point of view and in a rigorous way reach the state of the art in the field we understand fundamentals in this context as 1 fundamentals in the sense of a carefully motivated introduction to algebraic specification which is understandable for computer scientists and mathematicians 2 fundamentals in the sense of mathematical theories which are the basis for precise definitions constructions results and correctness proofs 3 fundamentals in the sense of concepts from computer science which are introduced on a conceptual level and formalized in mathematical terms
