the conventional model for explaining the uniqueness of american democracy is its division between executive legislative and judicial functions it was the great contribution of frank j goodnow to codify a less obvious but no less profound element the distinction between politics and policies principles and operations he showed how the united states went beyond a nation based on government by gentlemen and then one based on the spoils system brought about by the jacksonian revolt against the eastern establishment into a government that separated political officials from civil administrators goodnow contends that the civil service reformers persuasively argued that the separation of administration from politics far from destroying the democratic links with the people actually served to enhance democracy while john rohr in his outstanding new introduction carefully notes loopholes in the theoretical scaffold of goodnow s argument he is also careful to express his appreciation of the pragmatic ground for this new sense of government as needing a partnership of the elected and the appointed goodnow was profoundly influenced by european currents especially the hegelian as a result the work aims at a political philosophy meant to move considerably beyond the purely pragmatic needs of government for it was the relationships the need for national unity in a country that was devised to account for and accommodate pluralism and diversity that attracted goodnow s legal background and normative impulses alike that issues of legitimacy and power distribution were never entirely resolved by goodnow does not alter the fact that this is perhaps the most important work

along with that of James Bryce to emerge from this formative period to connect processes of governance with systems of democracy. Frank J. Goodnow, until his death, served as professor of administrative law at Columbia University. He is considered the founder of the field of public administration by leading political scientists such as Samuel C. Patterson and others. John A. Rohr is professor of public administration at Virginia Polytechnic Institute and State University in Blacksburg, Virginia. He is the author of seven books and over one hundred articles and reviews. These include *Ethics for Bureaucrats*, an essay on law and values, and *To Run a Constitution*.

As in earlier editions, the book is organized around a set of seven core principles: 1. serve citizens, not customers; 2. seek the public interest; 3. value citizenship and public service above entrepreneurship; 4. think strategically, act democratically; 5. recognize that accountability isn't simple; 6. serve rather than steer; 7. value people, not just productivity. The book asks us to think carefully and critically about what public service is, why it is important, and what values ought to guide what we do and how we do it.
