psychology and other sciences an integrated perspective the importance of an interdisciplinary approach bridging the gap understanding human behavior the role of biology in shaping the mind exploring the intersection of psychology and technology applying psychological principles to social sciences the future of integrated research and innovation conclusion embracing the power of collaboration

global climate change rapid substantial and human induced may have radical consequences for life on earth the problem is a complex one however demanding a multi disciplinary approach a simple cost benefit analysis cannot capture the essentials nor can the issue be reduced to an emissions reduction game as the kyoto process tries to do it is much more sensible to adopt an integrative approach which reveals that global climate change needs to be considered as a spider in a web a triggering factor for a range of other related problems land use changes water supply and demand food supply energy supply human health air pollution etc but an approach like this which takes account of all items of knowledge known and uncertain does not produce clear cut final and popular answers it does provide useful insights however which will allow comprehensive and effective long term climate strategies to be put into effect climate change an integrated perspective will appeal to a broad spectrum of readers it is a useful source for the climate change professionals such as policy makers and analysts natural and social scientists it is also suitable for educationalists students and indeed anyone interested in the fascinating world of multidisciplinary research underlying our approach to this global change issue

this book written by an international group of experts from china europe and the usa presents a broad and comprehensive analysis of the chemical and meteorological processes responsible for the formation of air pollutants in eastern asia and in particular for the development of severe pollution episodes observed primarily during winter in the northeastern part of china with the rapid population growth economic development and urbanization occurring in asia air pollution has become a major environmental problem in this part of the world the book is organized around six distinct parts the first part of the volume offers a general perspective on issues related to air pollution including persistent haze events in eastern and southern asia the second part presents an overview of air

pollution sources i.e anthropogenic and biomass burning sources the third part analyzes in situ observations of chemical species in china while the fourth part focuses on space observations of gas phase and aerosol species the modeling aspects are treated in the fifth part of the volume which includes a presentation of several air quality forecast systems and an assessment of the role of urbanization on air pollution levels finally the effects of air pollution on health and crop productivity in china are discussed in the last part of the book the book also presents an integrated view of past and present situations in asia and provides the scientific basis from which mitigation policies can be established and air quality can be improved audience this book is written for scientists educators students environmental managers policy makers and leaders in public administration and private corporations who wish to use science based information to mitigate air pollution the book should help decision makers to design effective policies for air quality improvement and to successfully manage short term air pollution episodes that substantially affect people's quality of life and strongly impact the economy
