publisher description

this undergraduate textbook examines how formal and informal tests are created scored and interpreted by mental health professionals when evaluating clients and surveys the various techniques commonly used for assessing educational ability intelligence career and occupational aptitude and clinical issues

this text presents basic concepts in tests and assessment and contribute to a more intelligent understanding and use of psychological and educational tests

this text employs a somewhat traditional approach to the study of educational tests and measurement so that teachers will understand essential psychometric concepts and be able to apply them in the classroom the principles that guide the development of this text are 1 what essential knowledge and skills do classroom teachers need to conduct student assessments in a professional manner and 2 what does the research on educational assessment tell us this focus has resulted in

a uniquely approachable but technically accurate presentation of the material while providing a slightly more technical presentation of the material than more basic texts this text is both approachable and comprehensive the text includes a gentle introduction to the basic mathematics of measurement and expands traditional coverage to include a thorough discussion of performance and portfolio assessments a complete presentation of assessment accommodations for students with disabilities and a practical discussion of professional best practices in educational measurement

this is a comprehensive and up to date synthesis of the theories research and research methods designed to explore how why when and to what extent females and males differ in intellectual abilities halpern s lively and highly accessible writing conveys complex ideas and interrelationships among variables in an engrossing and understandable manner providing a thought provoking perspective on a controversial and politically explosive topic her treatment bridges the gap between the sensationalized often shoddy pop literature and highly technical scientific publications
