the three basic questions of ebs are 1 what bio social psychological and cultural characteristics of human beings influence which characteristics of the built environment 2 what effects do which aspects of which environments have on which groups of people under what circumstances and when why and how and 3 given this two way interaction between people and environments there must be

mechanisms that link them what are these mechanisms focusing on answers to these and other questions culture architecture and design discusses the relationship between culture the built environment and design by showing that the purpose of design is to create environments that suit users and is therefore user oriented design must also be based on knowledge of how people and environments interact thus design needs to respond to culture in discussing 1 the nature and role of environment behavior studies ebs 2 the types of environments 3 the importance of culture 4 preference choice and design 5 the nature of culture 6 the scale of culture and 7 how to make culture usable amos rapoport states that there needs to be a change from designing for one's own culture to understanding and designing for users cultures and basing design on research in ebs anthropology and other relevant fields such changes should transform architecture and design so that it in fact does what it claims to do and is supposed to do create better i.e. more supportive environments

following upon the first two volumes in this series which dealt with a broad spectrum of topics in the environment and behavior field ranging from theoretical to applied and including disciplinary interdisciplinary and professionally oriented approaches we have chosen to devote subsequent volumes to more specifically defined topics thus volume three dealt with children and the environment seen from the combined perspective of researchers in environmental and developmental psychology the present volume has a similarly topical coverage dealing with the complex set of relationships between culture and the physical environment it is broad and necessarily eclectic with respect to content theory methodology and epistemological stance and the contributors to it represent a wide variety of fields and disciplines including psychology geography anthropology economics and environmental design we were fortunate to enlist the collaboration of amos rapoport in the organization and editing of this volume as he brings to this task a particularly pertinent perspective that combines anthropology and architecture volume five of the series presently in preparation will cover the subject of behavioral science aspects of transportation irwin altman joachim f wohlwill ix contents introduction 1 chapter 1 cross cultural aspects of environmental design amos rapoport introduction 7 culture 9 environmental design 10 the relationship of culture and environmental design 15 the variability of culture environment relations 19 culture specific environments 26 designing for culture 30 implications for the future 39 references 42 chapter 2 cross cultural research methods strategies problems applications richard w

in this collection of essays theorizing built form and culture the legacy of amos

rapoport a felicitation volume to celebrate the significance of professor amos rapoport s lifelong scholarship scholars from around the world discuss the analytical relevance expansion and continuing application of these contributions in developing an advanced understanding of mutual relationships between people and built environments across cultures professor amos rapoport has espoused an intellectual and theoretical legacy on environmental design scholarship that explains how cultural factors play a significant role in the ways people create and use environments as well as the way environments in turn influence people s behavior this volume presents a hitherto not seen unique and singular work that simultaneously articulates a cohesive framework of rapoport s architectural theories and demonstrates how that theoretical approach be used in architectural inquiry education and practice across environmental scales types and cultural contexts it also acknowledges for the very first time how this theoretical legacy has pioneered the decolonizing of the eurocentric approaches to architectural inquiry and has thus privileged an inclusive cross cultural perspective that laid the groundwork to understand and analyze non western design traditions the book thus reflects a wide range of cross cultural and cross contextual range to which professor rapoport s theories apply a general notion of theoretical validity he always advocated for in his own writings the volume is a paramount source for scholars and students of architecture who are interested in understanding how culture mediates the creation use and preservation of the built environment

outstanding explorations of design concepts principles and processes this second edition of introduction to landscape design offers even broader coverage of the environmental human technological and aesthetic issues associated with landscape design than the first edition beginning with the way we perceive manage and design the landscape it moves on to explore the forces that influence land design an overview of landscape management planning and design includes a discussion of the roles and integration of the professions involved modes of professional practice and site scale design processes the book explores the ecology of design and the integration of land design decisions into dynamic systems this fully updated new edition presents landscape design as a synergism of art and science addresses the interplay between buildings and sites provides insights into the breadth of people environment relationships places special emphasis on our growing understanding of interrelationships between the landscape and human decisions a superb introduction for students as well as a useful reference for practicing professionals this book is an excellent guide for anyone who wants to develop a better understanding of landscape design

this book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design however although what i am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as i discovered when i attempted to find supporting evidence in fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways i am advocating there is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations after years of neglect the study of history and the use of historical precedent are again becoming important however that interest has not led to new approaches to the subject nor have its bases been examined this i try to do in so doing i discuss a more rigorous and i would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design underlying this is my view of environment behavior studies cebs as an emerging theory rather than as data to help design based on current theory although this will be the subject of another book a summary statement of this position may be useful

the second edition of the urban design reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design nearly 50 generous selections include seminal contributions from howard le corbusier lynch and jacobson to more recent writings by waldheim koolhaas and sorkin following the widespread success of the first edition of the urban design reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today the six part structure of the second edition guides the reader through the history theory and practice of urban design the reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century part two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s these authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places the authors in part three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places these selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism the fourth part of the reader explores key issues in urban design and development ideas about sprawl density community health

public space and everyday life are the primary focus here several new selections in this part of the book also highlight important international development trends in the middle east and china part five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency the final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development the section concludes with several position pieces and debates on the future of urban design practice this book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

using cross national political economic and environmental comparisons as well as case studies from all parts of the world this volume focuses on the increasing problem of providing shelter in underdeveloped countries the innovative solutions that have been applied to the problem and the prospects for the future spontaneous shelter examines the contemporary and emerging issues that face homeless people in the third world and suggests policy actions that can be taken providing middle class as well as poverty level examples and considering environmental issues the contributors use case materials photographs and drawings to clarify the policy agenda for basic shelter provision author note carl v patton is dean of the school of architecture and urban planning at the university of wisconsin milwaukee

the handbook of interior design explores ways of thinking that inform the discipline of interior design it challenges readers to consider the connections within theory research and practice and the critical underpinnings that have shaped interior design offers a theory of interior design by moving beyond a descriptive approach to the discipline to a why and how study of interiors provides a full overview of the most current interior design research and scholarly thought from around the world explores examples of research designs and methodological approaches that are applicable to interior design upper division and graduate education courses brings together an international team of contributors including well established scholars alongside emerging voices in the field reflecting mature and emergent ideas research and philosophies in the field exemplifies where interior design sits in its maturation as a discipline and profession through inclusion of diverse authors topics and ideas

this book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design however although what i am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as i discovered when i attempted to find supporting evidence in fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways i am advocating there is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations after years of neglect the study of history and the use of historical precedent are again becoming important however that interest has not led to new approaches to the subject nor have its bases been examined this i try to do in so doing i discuss a more rigorous and i would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design underlying this is my view of environment behavior studies cebs as an emerging theory rather than as data to help design based on current theory although this will be the subject of another book a summary statement of this position may be useful

buildings are essentially social and cultural products they result from social needs and accommodate a variety of functions economic social political religious their size appearance location and form result not simply from physical factors such as materials climate or technology nor from architects designs but from a society s ideas its forms of economic and social organisation and the beliefs and values which prevail at any one time society produces its buildings and the buildings help to maintain many of its social forms

this title was first pulished in 2000 this collection of essays provides an excellent integrated source for the latest thinking in multiple disciplines on the issue of culture and its relationship with built form and hence human environmental experience whether one is primarily interested in how culture built environment inquiry affects theoretical issues research approaches research findings practical applications or has implications for teaching this book provides an engaging dialogue in regard to each of these perspectives as important the book s introduction provides a conceptual framework for integrating the various contributions in a meaningful and systemic fashion contributors come from disciplines including anthropology architecture human ecology psychology and urban planning
