international economic theories emerged within particular social economic and political frameworks and were developed as

solutions to the problems of contemporary economics in order to understand the increasingly complex and interdependent state of today's international economy we need to realise the importance of those theories that came before however many international economics textbooks do not place the theories they discuss within this historical context theories of international economics aims to redress the balance by taking a pluralistic approach presenting with authority both orthodox and heterodox international economic theories each chapter shows the necessarily interdependent nature of schools of international economic theories by including an historical component that shows how each school of thought developed why it developed and what it has to say about the contemporary world this text examines a wide range of theories with an emphasis on the benefits of a pluralistic approach addressing schools of thought including classical neoclassical keynesian post keynesian marxian austrian institutional and feminist economics mercantilism and neo mercantilism alongside and in relation to each other this approach allows the scholarly value of each approach to be understood and appreciated and in doing so enables a greater understanding of the world economy this book is suitable for use as either a core or supplementary text on international economics and international political economy courses
