the writing of this book perspective on analytical writing a focus on feature and editorial writing is based on the urge for students majoring in mass communication on the african continent particularly those within the economic community of west african states ecowas to have a simplistic understanding of the course feature and editorial writing it will be oblivious or a miss calculation to say that there are no texts books on feature and editorial writing on the african continent since i have not had the opportunity to extensively travel within africa but what could be safely said is for over three decades since i completed my undergraduate studies i have not seen a text book on feature and editorial writing readily based on this experience the book first endeavored in its starting to give students an insight on what an analytical writing is beginning with a drill on perspective and gave a detailed and vivid picture of perspective thereby laying the basis to understanding what feature and editorial writing is all about although the core focus of the book is on feature and editorial writing but as the title depicts perspectives on analytical writing more emphases are placed on perspective and analytical writing in order to provide a deeper understanding for the students as a foundation to grasp the concept of feature and editorial writing also the book featured research as a component to writing an appreciable feature and editorial piece added to research other ingredients for writing good feature and editorials are also considered they include opinion persuasion and propaganda furthermore since feature and editorial writings are within the scope of mass communication and journalism it became imperative for the book to touch on the ethical aspect of the profession aimed at providing students the barometer of knowing what to do and not what to do while writing feature and editorial pieces in its conclusive stage the book dealt with the impact of editorial on political actors as it relates to their involvement in the process of national development as you will come across in your reading mass communication and journalism are catalysts to agenda setting in any society therefore it is expected that stakeholders particularly those involved in the governance process of our countries in africa to take clue from editorial articles especially those that advocate for positive change to propel them to respond to the developmental needs of africa now let's be practical and reflect on a simple analogy referencing a performance by a group of movie stars such as the late popular comedian peter ballah of liberia kekura kamara with his popular movie malawala balawala of liberia salla kamara with his movie blood diamond of sierra leone mr ibu john okafor with the show mr ebu and his son of nigeria or john dumelo with the movie the tie that binds of ghana as these movie stars are performing in their movies the viewers are fascinated with emotion amusement and are thrilled by the performances while in their seats in the theatre movie hall or in their various homes just as the emotion of viewers is intrigued by the performances or movies so feature and editorial write ups are replica to evoking the emotion of the readers the articles must create a scenario of curiosity to arouse or entice the readers this is the drama in feature and editorial writing

in today's world where it has become fairly easy for a taxpayer to move back and forth from one country to another it has become quite a common tax strategy especially among wealthy individuals and multinational companies to transfer their residence income and assets abroad mainly to reduce tax burden particularly in Europe many wealthy individuals have moved their residence abroad mostly for tax purpose thus tennis legend Bjorn Borg who was known to have transferred decades ago his residence from Sweden to Monaco is obviously not alone a more recent well publicized case was Gerard Depardieu who showed his intention of leaving France after having acquired Russian citizenship in 2013 this famous French actor and entrepreneur is reported to have made a comment that the French government's recent plan of raising the top marginal individual income tax rate is just like penalizing talented people who have achieved success in their careers

The past two decades have seen an outpouring of work in legal theory that is self-consciously critical of aspects of American law and the institutions of the liberal state. In this lively volume eminent scholars in philosophy, law, and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law, examining such theories as critical legal studies, feminist theory, and theories of difference and critical race theory. The authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of American law should take. Writing at the cutting edge of the critique of critical legal theory, they offer insights: first on critical legal scholarship, then on feminist political and legal theory. A third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism, while a final section focuses on current issues of legal reform through critical views on criminal punishment, including observations on rape and hate speech. Each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it, while accompanying commentaries present conflicting views. The resulting dialogue explores wide-ranging issues like equity, value, relativism, adversarial and empathic legal advocacy, communitarianism, and the social contract, impartiality and contingency, natural law, and corrective justice. A common thread for many of the articles is a focus on the social dimension of society and law, which finds the individualism of prevailing liberal theories too limiting. Radical critiques of the law is particularly unique in presenting critical and feminist approaches in one volume, along with skeptical commentary about just how radical some critiques really are. Proposing alternative critiques that embody considerably greater promise of being truly radical, it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best.
