these tables have been carefully prepared for the many users of statistical analysis at an introductory level the enthusiastic reception accorded to the author's statistics tables George Allen Unwin 1978 by specialist statisticians highlighted the need for a briefer set of tables to be tailored to the requirements of students who have to use statistical analysis but with no greater commitment to it than is represented by a basic and often brief introductory course both the coverage and the presentation of this set of tables have been determined with great care in contrast with competing sets at this level the content should match closely the requirements of users who have little mathematical background the book is a positive teaching and learning aid not just a stark and impenetrable reference item most of the tables are accompanied by fully explanatory introductory text and by some examples of use each table has been designed and laid out carefully for maximum clarity and ease of use features which the large page size should also reinforce there are many new or improved tables some being much more extensive than in competing books in view of the increasing recognition of nonparametric tests for their convenience ease of use and wide application the tables covering these tests should provide especially valuable these tables should serve the needs of all users of elementary techniques of statistical analysis from engineers and technicians to geographers and social scientists all students taking first courses in statistical analysis will find them an invaluable aid

key message the eleventh edition of this highly regarded introductory text emphasizes inference and sound decision making through its extensive coverage of data collection and analysis McClave develops statistical thinking and teaches readers to properly assess the credibility of inferences from the vantage point of both the consumer and the producer this edition incorporates more exercises and more visual features such as redesigned end of chapter summaries and an increased use of applets this text assumes a mathematical background of basic algebra key topics statistics data and statistical thinking methods for describing sets of data probability discrete random variables continuous random variables sampling distributions inferences based on a single sample estimation with confidence intervals inferences based on a single sample tests of hypothesis inferences based on a two samples confidence intervals and tests of hypotheses analysis of variance comparing more than two means simple linear regression multiple regression and model building categorical data analysis nonparametric statistics market for all readers interested in statistics

1867 68 include the statistical report of the secretary of state in continuation of the annual report of the commissioners of statistics

vol 25 is the report of the commissioner of education for 1880 v 29 report for 1877

a scientific and educational journal not only for professional statisticians but also for economists business executives research directors government officials university professors and others who are seriously interested in the application of statistical methods to practical problems in the development of more useful methods and in the improvement of basic statistical data

july 1918 include reports of various neurological and psychiatric societies
