Mosby's Guide to Nursing Diagnosis, 6th edition, revised reprint with 2021-2023 NANDA-I updates, e-book.

The NABH 6th edition, effective January 2025, represents a pivotal update to India's hospital accreditation standards, aiming to advance patient safety, operational efficiency and overall healthcare quality. The 6th edition reduces total objective elements from 651 to 639 but raises core ones to 105, indicating a sharper focus on essential patient safety aspects. Compliance language now uses "shall" not "should," making previously recommended practices mandatory, increasing hospital accountability and the regulatory weight of each requirement. Newly introduced standards include Promotive/Preventive Health, which expands hospitals' focus to wellness, education and disease prevention, and Sustainability in Healthcare, obliging hospitals to adopt eco-friendly practices like robust waste management and energy conservation. These new areas demand significant investment in policy-making, training and infrastructure, presenting particular challenges since most hospitals lack existing frameworks in these domains. Critical updates strengthen demands for transfusion, obstetric services, hospital security and cybersecurity, requiring alignment with Ministry of Health and international benchmarks. The renaming of Hospital Infection Control to Infection Prevention and Control underlines a proactive strategy against healthcare-associated infections. Historical NABH audits reveal that documentation errors account for about 70% of non-conformities, underscoring a deep, ongoing compliance problem. Common non-conformity areas, prioritized by impact and frequency, include Information Management Systems, persistent documentation lapses and digital health/cybersecurity deficiencies. Non-compliance can compromise patient safety, data privacy and organizational reputation due to legal risks or regulatory penalties. Solutions include standardized digital protocols, robust EHR adoption and continuous staff training. Human Resource Management (HRM) issues, such as insufficient staff training, high attrition, clinician inertia and credentialing gaps, limit care quality and safety; addressing this requires competency-based training, strong leadership support and strict credentialing processes. Facility Management (FM) safety, fire
