philosophers working within the pragmatist tradition have pictured their relation to kant and kantianism in very diverse terms some have presented their work as an appropriation and development of kantian ideas some have argued that pragmatism is an approach in complete opposition to kant this collection investigates the relationship between pragmatism kant and current kantian approaches to transcendental arguments in a detailed and original way chapters highlight pragmatist aspects of kant's thought and trace the influence of kant on the work of pragmatists and neo pragmatists engaging with the work of peirce james lewis sellars rorty and brandom among others they also consider to what extent contemporary approaches to transcendental arguments are compatible with a pragmatist standpoint the book includes contributions from renowned authors working on kant pragmatism and contemporary kantian approaches to philosophy and provides an authoritative and original perspective on the relationship between pragmatism and kantianism

the aim of this volume is to offer an updated account of the transcendental character of phenomenology the main question concerns the sense and relevance of transcendental philosophy today what can such philosophy contribute to contemporary inquiries and debates after the many reasoned attacks against its idealistic aprioristic absolutist and universalistic tendencies voiced most vigorously by late 20th century postmodern thinkers as well as attacks against its apparently circular arguments and suspicious metaphysics launched by many analytic philosophers contributors also aim to clarify the relations of transcendental phenomenology to other post kantian philosophies most importantly to pragmatism and wittgenstein's philosophical investigations finally the volume offers a set of reflections on the meaning of post transcendental phenomenology

at a time when very urgent problems attend the safeguarding and securing of human liberty in the practical order an investigation of the metaphysical foundations of freedom is apt to be dismissed as an untimely and unprofitable bit of theorizing however the very urgency of the problems ought to prompt a willingness to examine and if necessary to revise our fundamental notion of what it means to be free inasmuch as freedom belongs to every spiritual being an adequate understanding of its essence can be gained only from a study of freedom wherever it is found namely in god and in angels as well as in man it is all too easy to confound human freedom with freedom as such and to read into the notion of freedom the imperfections which happen to attend the human mode without however recognizing them as limitations inadequacy of knowledge in this case amounts to positive error for one of the most important facts about human freedom is its essentially limited and imperfect character the thesis which this dissertation undertakes to establish therefore is that free will is not a univocal perfection proper to man but a transcendent perfection of being participating the analogical nature of being as an exercise of the act of to be the metaphysical roots of liberty are sought in the doctrine of participation which teaches that the perfections of created existence are deficient likenesses of the absolute perfections of the creator in whom they exist essentially and without limit
