a watermelon seems green on the outside but it is red on the inside as well as in reports there are some indicators  
 that are presented as if they were green due to flaws made in metrics calculation or wrong calculation function as a  
 result project monitoring is damaged and control is not activated to solve a problem but way more than a problem  
 a red light means a cry for help it means a monitoring alert sent so a control action can be taken such a logic  
 sequence in first of all monitoring and controlling items is not always followed and among other issues traffic light  
 indicators are commonly applied without the need of a precision measure these are the atomic watermelons in  
 projects and this book is an invitation for us to think about the way the current processing structuring organization

is made in the pmbok guide we propose changes in it you will learn about metrics and its meanings through a mix of equations and practical examples that may assist in enabling a reliable monitoring system besides a free projects control when atomic watermelons come up
