burned at the stake for heresy giordano bruno 1548 1600 was one of the renaissance s more controversial thinkers current scholarship

tends to read bruno as either a neo platonist who ultimately collapses reality to an overarching unity or as an eclectic thinker whose disparate and disjointed musings are essentially incoherent by closely and critically examining bruno s writings this book demonstrates that bruno was very much in the spirit of modernity in that he tried to explain philosophically the possibility of the coexistence of unity and multiplicity difference through the then scientific logic of the coincidence of opposites his metaphysics cosmology and ethical thinking are to be understood through this underlying logic of coincidence thereby rendering bruno neither an absolute neo platonist nor unintelligible
