this book constitutes the refereed proceedings of the bienially held international conference on computer analysis of images and patterns caip 2009 which took place in münster germany september 2 4 2009 the 148 papers presented together with 2 invited talks were carefully reviewed and selected from 405 submissions the papers are organized in topical section on biometrics calibration document analysis features graph representations image processing image registration image and video retrieval medical imaging object and scene recognition pattern recognition shape recovery segmentation stereo and video analysis texture analysis and applications

this book elucidates findings from an anthropological study that analyzes the patterns of taiwan s atayal tribe s fabric in their ethnic dress codes by analyzing the changes and development of the patterns over time the authors draw fascinating conclusions regarding the geographical migration and intermarriage practices between indigenous minority groups in taiwan s history the book brings new insights within east asian linguistic anthropology in theorizing about the origins of legends and broader patterns of ethnic migration integrating the characteristics and relationships among atayal fabrics and interpreting these relationships in connection with the flow of sub ethnic groups in doing so the book provides rich empirical evidence for anthropologists and migration scholars to better understand the movement of ethnic groups in taiwan while also establishing a model for how studying textile design can be employed to establish such linkages the book shows that the composition and changes of ethnic minority patterns have their own internal logic and causes by studying this the authors demonstrate how such work might translate intangible and tangible culture into explicit and shareable knowledge and provide a compass for other anthropologists and researchers in the fields of visual and linguistic anthropology migration studies and

ethnic and indigenous cultures in asia and beyond

the 2022 2nd international conference on information control and automation icica 2022 was held on december 2nd 4th 2022 in chongqing china virtual event invited and contributed papers present the state of the art research in information control and automation this workshop always welcomes a fruitful mix of experienced researchers and students to allow a better understanding of related fields the 2022 session of the information control and automation was doubtlessly a great success the program covered a wide variety of topics namely numerical analysis information theory genetic algorithm distributed control system industrial control motors and appliances etc the conference agenda was divided into two parts including keynote speeches and oral presentations icica 2022 is to bring together innovative academics and industrial experts in the field of information control and automation to a common forum the primary goal of the conference is to promote

research and developmental activities in information control and automation and another goal is to promote scientific information interchange between researchers developers engineers students and practitioners working all around the world the conference will be held every year to make it an ideal platform for people to share views and experiences in information control and automation and related areas everyone interested in these fields were welcomed to join the online conference and to give comments and raise questions to the speeches and presentations

high energy charged particles represent a cutting edge technique in radiation oncology protons and carbon ions are used in several centers all over the world for the treatment of different solid tumors typical indications are ocular malignancies tumors of the base of the skull hepatocellular carcinomas and various sarcomas the physical characteristics of the charged particles bragg peak allow sparing of much more normal tissues than it is possible using conventional x rays and for this reason all pediatric tumors are considered eligible for protontherapy ions heavier than protons also display special radiobiological characteristics which make them effective against radioresistant and hypoxic tumors on the other hand protons and ions with high charge z and energy hze particles represent a major risk for human space exploration the main late effect of radiation exposure is cancer induction and at the moment the dose limits for astronauts are based on cancer mortality risk the mars science laboratory msl measured the dose on the route to mars and on the planet s surface suggesting that a human exploration missions will exceed the radiation risk limits notwithstanding many studies on carcinogenesis induced by protons and heavy ions the risk uncertainty remains very high in this research topic we aim at gathering the experiences and opinions of scientists dealing with high energy charged particles either for cancer treatment or for space radiation protection clinical results with protons and heavy ions as well as research in medical physics and pre clinical radiobiology are reported in addition ground based and spaceflight studies on the effects of space radiation are included in this book particularly relevant for space studies are the clinical results on normal tissue complications and second cancers the ebook nicely demonstrates that particle therapy in oncology and protection of astronauts from space radiation share many common topics and can learn from each other
