is global violence on the decline scholars argue that harvard psychologist steven pinker s proposal that violence has declined dramatically over time is flawed this highly publicized argument that human violence across the world has been dramatically abating continues to influence discourse among academics and the general public alike in this provocative volume a cast of eminent historians interrogate pinker s thesis by exposing the realities of violence throughout human history in doing so they reveal the history of human violence to be richer more thought provoking and considerably more complicated than pinker claims from the introduction not all of the scholars included in this volume agree on everything but the overall verdict is that pinker s thesis for all the stimulus it may have given to discussions around violence is seriously if not fatally flawed the problems that come up time and again are the failure to genuinely engage with historical methodologies the unquestioning use of dubious sources the tendency to exaggerate the violence of the past in order to contrast it with the supposed peacefulness of the modern era the creation of a number of straw men which pinker then goes on to debunk and its extraordinarily western centric not to say whiggish view of the world complex historical questions as the essays in this volume clearly demonstrate cannot be answered with any degree of certainty and certainly not in a simplistic way our goal here is not to offer a final definitive verdict on pinker s work it is rather to initiate an ongoing process of assessment that in the future will incorporate as much of the history profession as possible
