why is it that some people find it easy to solve tough problems with simple solutions while others find this feat nearly impossible you ve no doubt looked at solutions to
 problems and said i should have thought of that but you didn t the answer is not just creativity although that certainly helps rather the power to find these creative solutions
 lies in our ability to search for and find facts that relate to the situation and put them together in ways that work as an individual facts and knowledge can only go so far by

tapping into the knowledge of others staff colleagues family or friends anyone can expand the range of solutions available this is a very quick read and can be done over breakfast lunch or a coffee break so enjoy feeding your mind what is a problem a problem is a gap between ideal and actual conditions a decision is a choice between alternative solutions to a problem problems can be classified in three ways problems that have already happened problems that lie ahead problems you want to prevent from happening there are three ways to approach problems you can stall or delay until a decision is no longer necessary or until it has become an even greater problem you can make a snap decision off the top of your head with little or no thinking or logic you can use a professional approach and solve problems based on sound decision making practices

this book seeks to uncover the linkages between business leaders motivated by profit and political decision makers motivated by electoral gain by examining the responses of public officials in three michigan auto cities detroit flint and pontiac to plant location choices made by general motors and chrysler throughout the authors focus on three issues the relationship between the local industrial economy and the local political system the structure of urban politics and the degree of independence of political decision makers in urban affairs

like other big city school systems chicago s has been repeatedly reformed over the last century yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students many blame the educational establishment for resisting change other critics argue that reform occurs too often still others claim it comes not often enough dorothy shipp reappraises the tumultuous history of educational progress in chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out shipp chronicles how chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others to show why city schools have failed urban children so badly she traces chicago s reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system her narrative encompasses the formative era of 1880 1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s she also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates business people may be too wedded to a stunted view of educators to forge a productive partnership for change unionized teachers bridle at the second class status accorded them by managers if reform is to reach deeply into classrooms shipp concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests this study clearly shows that in chicago as elsewhere urban schooling is intertwined with politics and power by reviewing more than a century of corporate efforts to make education work shipp makes a strong case that it s high time to look elsewhere perhaps to educators themselves for new leadership
