system dysfunction by managing whole ecosystems not just single species however national park management is not just limited to conservation strategies national park management includes a widespread variety of management activities such as the most essential activities like park system planning land protection natural resource management biological resource management fire management water resource management air resource management geologic resource management soundscape and lightscape management cultural resource management e g archeological resources cultural landscape ethnographic resources historic structures wilderness preservation and management interpretation and education tourism visitor management and park facilities management it is clear that in each park the emphasis of management activities should be adapted to the needs of the park its problems and challenges however the next generation of park managers will need to be able to tolerate ambiguity manage change manage tourism patterns set and communicate priorities handle controversy and understand political processes
