instructional design theories and models volume iv provides a research based description of the current state of instructional theory for the learner centered paradigm of education as well as a clear indication of how different theories and models interrelate significant changes have occurred in learning and instructional theory since the publication of volume iii including advances in brain based learning learning sciences information technologies internet based communication a concern for customizing the student experience to maximize effectiveness and scaling instructional environments to maximize efficiency in order to complement the themes of volume i

commonality and complementarity among theories of instruction volume ii diversity of theories and volume iii building a common knowledge base the theme of volume iv is shifting the paradigm of instruction from teacher centered to learner centered and integrating design theories of instruction assessment and curriculum chapters in volume iv are collected into three primary sections a comprehensive view of the learner centered paradigm of education and training elaborations on parts of that view for a variety of k 12 and higher education settings and theories that address ways to move toward the learner centered paradigm within the teacher centered paradigm instructional design theories and models volume iv is an essential book for anyone interested in exploring more powerful ways of fostering human learning and development and thinking creatively about ways to best meet the needs of learners in all kinds of learning contexts

firefighters and other emergency first responders use a huge variety of highly specialized and critical technologies for personal protection these technologies ranging from gps to environmental sensing to communication devices often run on different systems with separate power supplies and operating platforms how these technological components function in a single synergistic system is of critical interest to firefighter end users seeking efficient tools interoperable ese states that a standardized platform for electronic safety equipment ese is both logical and essential this book develops an inventory of existing and emerging electronic equipment categorized by key areas of interest to the fire service documents equipment performance requirements relevant to interoperability including communications and power requirements and develops an action plan toward the development of requirements to meet the needs of emergency responders this book is intended for practitioners as a tool for understanding interoperability concepts and the requirements of the fire service landscape it offers clear recommendations for the future to help ensure efficiency and safety with fire protection equipment researchers working in a related field will also find the book valuable
