the routledge handbook of gender and environment gathers together state of the art theoretical reflections and empirical research from leading researchers and practitioners working in this transdisciplinary and transnational academic field over the course of the book these contributors provide critical analyses of the gender dimensions of a wide range of timely and challenging topics from sustainable development and climate change politics to queer ecology and interspecies ethics in the so called anthropocene presenting a comprehensive overview of the development of the field from early political critiques of

the male domination of women and nature in the 1980s to the sophisticated intersectional and inclusive analyses of the present the volume is divided into four parts part i foundations part ii approaches part iii politics policy and practice part iv futures comprising chapters written by forty contributors with different perspectives and working in a wide range of research contexts around the world this handbook will serve as a vital resource for scholars students and practitioners in environmental studies gender studies human geography and the environmental humanities and social sciences more broadly

this book explores the role of institutions in economic growth looking in particular at specific asian countries and at particular cities within those countries it considers a wide range of factors besides institutions including the law cultural factors and overall government arrangements the differences between the countries studied are highlighted and the impact of these differences assessed the impact of english common law on arrangements in hong kong singapore and malaysia sharia law in malaysia the differing lengths of time of colonial rule the extent to which chinese family businesses control an economy also studied are the degree to which the law is effectively applied and a range of other social economic and cultural factors the book s conclusions as to which factors have the greatest impact will be of considerable interest to economists of asia and those interested in economic growth more widely

the past decade has seen increased attention to cost effectiveness and benefit cost analysis in education as administrators are being asked to accomplish more with the same or even fewer resources philanthropists are keen to calculate their return on investment in social programs and the general public is increasingly scrutinizing how resources are allocated to schools and colleges this text titled cost effectiveness analysis in its previous editions is the only full length book to provide readers with the step by step methods they need to plan and implement a benefit cost analysis in education the authors examine a range of issues including how to identify measure and distribute costs how to measure effectiveness utility and benefits and how to incorporate cost evaluations into the decision making process the updates to the third edition reflect the considerable methodological development in the evaluation literature and the greater empiricism practiced by education researchers to help readers learn to apply more advanced methods to their own analyses sage congratulates author henry m levin winner of the 2017 aera distinguished contributions to research in education award

scientific study from the year 2017 in the subject tourism miscellaneous university of kelaniya course economic modelling language english abstract measuring the contribution of tourism to a national economy has always been a frustrating exercise tourism does not have specific products it represents the sum of expenditure by travellers for wide range of products it is not

possible to identify tourism as a single industry in the national accounts its value to the economy is not readily revealed as a result of the absence of tourism in official economic statistics there is often an on going battle to establish tourism credibility as an economic activity and generator of income in the economy as a result a significant volume of tourism research over the past few decades have focussed on the development and use of a variety of economic techniques aimed at quantifying the effects of tourism on an economy in conventional literature has proven that computable general equilibrium cge modelling is the best applied tool addressing and analysing tourism related issues in an economy the paper provided a complete description of the theoretical structure of the cge tourism including all equations and variables by using relevant excerpts for different blocks of equations in the tablo file associated with the gempack software used to operationalise the model the incorporation of tourism using the dummy sector approach into an orani type cge model as an extension and can be considered as the main contribution of this study to the cge modelling literature for an economy this is a clear departure from the traditional methods used for tourism modelling in an economy this model can be used to simulate the economic impact of the tourism boom in an economy

presenting principles of economics this textbook aims to instill economic sensibility in the student it emphasizes the intellectual and historical context to which the economic models are applied
