china s war of resistance against japan as wwii is known in china was never about the defeat of japan alone china was also at war with itself between 1937 and 1949 a vicious revolutionary war between nationalists and communists divided by radically different views about china s future ravaged the country killing millions and laying waste to cities and the countryside the outcomes of these wars have shaped the country and the world since china at war focuses on this period examining the complex truth behind the propaganda of both east and west cambridge professor hans van de ven shows how the results of the fighting ended european imperialism in east asia restored china to its traditional position of regional centrality and gave the usa a decisive role in east asian politics in the process he argues it also triggered profound changes in warfare as important as the development of atomic weapons and gave the countryside a new social political and military significance through fascinating personal accounts and extensive scholarship china at war casts new light on this crucial period of history and harnesses contemporary art culture and ideology to illuminate world changing events

the authors of this collection explore the main aspects of the chinese revolution in the crucial period of the 1920s such as the united front policy the development of communism institutional issues and social movements

presents an account of the chinese civil war and what the communist victory meant to chinese society and the chinese people

includes selections from the daily bulletins of the china information committee

a concise introduction to the political economic and social factors that determine china s government highly respected specialist june teufel dreyer offers expert analysis of the

challenges facing china's economic legal military social and cultural institutions while examining the historical context and current trends china's political system asks readers to think about the broader problem of governance in china by comprehensively showing how the past and present impact leaders citizens ethnic minorities and policies note this is just the standalone book

a vivid account of china's unstoppable quest to build a railway into tibet and its obsession to transform its land and its people in the summer of 2006 the chinese government fulfilled a fifty year plan to build a railway into tibet since mao zedong first envisioned it the line had grown into an imperative a critical component of china's breakneck expansion and the final maneuver in strengthening china's grip over this remote and often mystical frontier which promised rich resources and geographic supremacy over south asia through the lives of the chinese and tibetans swept up in the project fortune magazine writer abraham lustgarten explores the wild west atmosphere of the chinese economy today he follows innovative chinese engineer zhang luxin as he makes the train's route over the treacherous mountains and permafrost possible for now and the tenacious tibetan shopkeeper rinzen who struggles to hold on to his business in a boomtown that increasingly favors the han chinese as the railway the highest and steepest in the world extends to lhasa and china's go west campaign delivers waves of rural poor eager to make their fortunes their lives and communities fundamentally change sometimes for good sometimes not lustgarten's book is a timely provocative and absorbing first hand account of the chinese boom and the promise and costs of rapid development on the country's people

china's mid twentieth century wars pose extraordinary interpretive challenges the issue is not just that the chinese fought for such a long time from the marco polo bridge incident of july 1937 until the close of the korean war in 1953 across such vast territory as hans van de ven explains the greatest puzzles lie in understanding china's simultaneous external and internal wars much is at stake politically in how this story is told today in its official history and public commemorations the people's republic asserts chinese unity against japan during world war ii but this overwrites the era's stark divisions between communists and nationalists increasingly

erasing the civil war from memory van de ven argues that the war with japan the civil war and its aftermath were in fact of a piece a singular process of conflict and political change reintegrating the communist uprising with the sino japanese war he shows how the communists took advantage of wartime to increase their appeal how fissures between the nationalists and communists affected anti japanese resistance and how the fractious coalition fostered conditions for revolution in the process the chinese invented an influential paradigm of war wherein the clausewitzian model of total war between well defined interstate enemies gave way to murky campaigns of national liberation involving diverse domestic and outside belligerents this history disappears when the realities of china s mid century conflicts are stripped from public view china at war recovers them
