curriculum leadership by middle leaders focusses on major issues relating to the continuing national and international discourse on curriculum leadership and highlights the vital role of middle leaders in schools school leadership has focused primarily on first order change involving school leaders or principals this book seeks to put the spotlight on second order change that involves curriculum leadership and professional development support on the part of middle leaders for more sustainable and long term change in teaching and learning that will influence what happens in classrooms with timely and thought provoking contribution from authors who pursue a range of scholarly interests in multiple educational settings the book is guided by several underlying questions how might we re envision curriculum leadership so that it addresses both local and global concerns and aspirations how might we better grasp how middle leaders understand and respond to the pressures of educational reform initiatives how might middle leaders transform pressures into possibilities this book will appeal to current teachers those currently undertaking teacher training and students or academics carrying out research in the field of educational leadership

teaching science in elementary and middle school offers in depth information about the fundamental features of project based science and strategies for implementing the approach in project based science classrooms students investigate use technology develop artifacts collaborate and make products to show what they have learned paralleling what scientists do project based science represents the essence of inquiry and the nature of science because project based science is a method aligned with what is known about how to help all children learn science it not only helps students learn science more thoroughly and deeply it also helps them experience the joy of doing science project based science embodies the principles in a framework for k 12 science education and the next generation science standards blending principles of learning and motivation with practical teaching ideas this text shows how project based learning is related to ideas in the framework and provides concrete strategies for meeting its goals features include long term interdisciplinary student centered lessons scenarios learning activities and connecting to framework for k 12 science education textboxes more concise than previous editions the fourth edition offers a wealth of supplementary material on a new companion website including many videos showing a teacher and class in a project environment

this book presents a framework for decision making provides an overview of the curriculum decision making process and contains detailed information on a variety of science curricula and curriculum resources

thoughtfully and thoroughly reviews the past analyzes the separate subject approach and outlines a proposal for a new general education program that would transform the middle level school

the study of curriculum beginning in the early 20th century first served the areas of school administration and teaching and was used to design and develop programs of study the field subsequently expanded and drew upon disciplines from the arts humanities and social sciences to examine larger educational forces and their effects upon the individual society and conceptions of knowledge curriculum studies now embraces an array of academic scholarship in relation to personal and institutional needs and interests while it also focuses upon a diverse and complex dynamic among educational experiences practices settings actions and theories the encyclopedia of curriculum studies provides a comprehensive introduction to the academic field of curriculum studies for the

scholar student teacher and administrator this two volume set serves to inform and to introduce terms events documents biographies and concepts to assist the reader in understanding aspects of this rapidly changing expansive and contested field of study key features displays different perspectives by having authors contribute independent essays on the nature and future of curriculum studies presents a unique and in depth treatment of the twenty sixth yearbook of the national society for the study of education nsse a 1927 publication that has taken on legendary dimensions for the field of curriculum studies contains bibliographic entries which feature specific publications by curriculum leaders that helped to define the field helps readers to learn unfamiliar terms and concepts to become more comfortable with specialized phrases and to understand the many significant and perplexing concepts and questions that characterize the field key themes biography and prosopography concepts and terms content descriptions influences on curriculum studies inquiry and research nature of curriculum studies organizations schools and projects publications theoretical perspectives types of curricula the encyclopedia of curriculum studies offers the careful reader a surprisingly revealing depiction of the conventions mores and accepted research and writing practices of the field of curriculum studies as it continues to expand and change availability in print and electronic formats provides students with convenient easy access wherever they may be

this text provides an overview of current science teaching practices for the elementary and middle grades the authors top scholars in the field of science education believe that all children should develop an in depth and meaningful understanding of scientific concepts and processes to achieve this the text utilizes the project based approach project based science stresses that science teaching should emphasize the active engagement of students in science rather than teachers telling students information each chapter has several portfolio activity boxes that provide active learning experiences or reflections for the student like the first edition the text includes numerous strategies in each chapter that help both new and experienced teachers understand how to teach science in an active and engaging manner the text also shows teachers how to implement the national science education standards nses and constructivist strategies a nses marginal feature keys content to the standards moreover this textbook helps teachers learn how to implement all of today s major reforms not just read about them

we anticipate that the comprehensive nature of this work will attract readers from multiple audiences that include state and district mathematics supervisors middle grades mathematics teachers and administrators involved in curriculum reform as well as mathematics teacher educators those about to embark on the review of curriculum materials will appreciate reading about the processes employed by other districts readers with interests in a particular curriculum program will be able to trace the curriculum specific chapters to gain insights into how the design of the curricula relate to professional development adoption and implementation issues and teachers personal experience using the curriculum materials individuals who provide professional development at the middle grades level will find chapters that they can use for both general and focused discussions

section one describes current research concerning interdisciplinary curriculum section two contains 23 examples of successful interdisciplinary curricula that can be used in middle schools or junior high schools section three presents 19 interdisciplinary curricula at high school level section fo

in this study i adopted a combined individual and sociocultural perspective on learning in order to investigate small group discussions in an inquiry based middle school science classroom the specific purpose of the study was to answer the following research questions a how can we classify students sense making statements b to what extent do students engage in sense making discussion smd and c which factors provide support for students smd to answer these questions two groups were videotaped during the interactions and motion unit from the constructing ideas in physical science middle school curriculum to classify students sense making statements i developed a six component framework for sense making discussion my six components of sense making discussion are predicting a phenomenon or experimental outcome clarifying the facts of a phenomenon or experimental result describing and explaining a phenomenon or experimental result defining describing clarifying and connecting scientific concepts procedures processes and representations testing knowledge compatibility and making a request for any of the above the extent of students sense making discussions was established by a documenting instances of student sense making according to the six component scheme and then forming distributions of sense making instances and b calculating the percentage of time that groups dedicated to sense making discussion to determine the influence that various factors have on students sense making discussions i first drew on the research in collaboration discourse and nonverbal sense making to arrive at an initial list of personal group task and contextual factors that would likely influence the smd in this study i then picked out significant quantitative differences in sense making between groups students and different portions of the curriculum cycles sub sections etc and determined to what extent the initial list of factors contributed to the significant differences in smd and also to what extent any additional factors contributed to these differences my analysis showed that many of the factors from the initial list helped to explain the differences in sense making i also identified six other factors that contributed to these differences capacity for intra group guidance intellectual capacity time available for sense making external guidance awareness of the curriculum structure and an awareness and valuing of the curriculum goals

unlike any other text teaching reading in the middle grades provides a balanced readable analysis of recent documents developed by professional organizations researchers and government agencies including the national council of teachers of english the international reading association and the national reading panel with its careful balance of the different dimensions presented in current research outlining that the teacher not only the method is a crucial factor in student achievement this text helps students grasp the scope and complexity of student achievement in literacy

this important new book describes everything a middle school teacher should know when teaching adolescents
