a collection of 15 papers from the American Ceramic Society's 40th International Conference on Advanced Ceramics and Composites held in Daytona Beach, Florida, January 24-29, 2016. This issue includes papers presented in symposia: 6 Advanced Materials and Technologies for Energy Generation, Conversion, and Rechargeable Energy Storage; Symposium 13 Advanced Ceramics and Composites for Sustainable Nuclear Energy and Fusion Energy; and Focused Session 2 Advanced Ceramic Materials and Processing for Photonics and Energy.

The valuable test prep guide, now in an updated edition, includes subject review chapters for every subject covered on the test, 3 full-length tests with complete answer explanations.

This book covers cutting-edge findings related to uncertainty quantification and optimization under uncertainties, i.e., robust and reliable optimization, with a special emphasis on aeronautics and turbomachinery. Although not limited to these fields, it describes new methods for uncertainty quantification, such as non-intrusive polynomial chaos, collocation methods, perturbation methods, as well as adjoint-based and multi-level Monte Carlo methods. It includes methods for characterization of most influential uncertainties, as well as formulations for robust and reliable design optimization. A distinctive element of the book is the unique collection of test cases with prescribed uncertainties, which are representative of the current engineering practice of the industrial consortium partners involved in UMRI-DA, a Level 1 collaborative project within the European Commission's Seventh Framework Programme (FP7). All developed methods are benchmarked against these industrial challenges. Moreover, the book includes a section dedicated to best practice guidelines for uncertainty quantification and robust design optimization, summarizing the findings obtained by the consortium members within the UMRI-DA project. All in all, the book offers an authoritative guide to cutting-edge methodologies for uncertainty management in engineering design, covers a wide range of applications, and discusses new ideas for future research and interdisciplinary collaborations.
