this book aims to help governments and public authorities to establish effective light rail light metro transit lrmt systems and focuses on use of public private participation ppp arrangements rather than identify a single approach we present options and discuss practical issues related to preparing and implementing new lrmt ppp schemes the approach is focused on providing information that can be used to make informed decisions adapted to local policy and objectives the material presented is intended as a practical guide to developing lrmt pppts in both developed and developing countries this work endeavors to provide answers to readers questions regarding how to successfully incorporate private sector participation in lrmt with a lesser emphasis on why lrmt and the private sector may be beneficial the primary focus of this text is guiding the reader from design through to project implementation it starts from the premise that underlying transport policy decisions will have already been made and that lrmt has already been identified as the appropriate transport solution we have included some limited discussion of policy and technical issues where these directly impact the lrmt ppp approach the approach is presented in nine sections and in preparing it the author drew on current international lrmt ppp experience through a series of interviews and case studies the sections covered are 1 urban transport and light rail light metro transit lrmt 2 selected technical aspects 3 incorporating private sector participation in lrmt initiatives 4 understanding and allocating risk 5 specifications oversight and performance management 6 funding and finance 7 developing a ppp agreement 8 procurement 9 conclusions and recommendations

urban transport systems worldwide are faced by a multitude of challenges among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world the prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner however a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure planning and design for sustainable urban mobility argues that the development of sustainable urban transport systems requires a conceptual leap the purpose of transportation and mobility is to gain access to destinations activities services and goods thus access is the ultimate objective of transportation as a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning this new report of the united nations human settlements programme un habitat the world s leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems the global report on human settlements is the most authoritative and up to date global assessment of human settlements conditions and trends preceding issues of the report have addressed such topics as cities in a globalizing world the challenge of slums financing urban shelter enhancing urban safety and security planning sustainable cities and cities and climate change

providing an overview of global railway networks and services railway directory 2008 outlines current issues and provides accurate data on all of the world s major networks

metropolitan railways is a large scale illustrated volume that deals with the growth and development of urban rail transit systems in north america
