in the past two decades research on environmental issues in east and southeast asian countries has mainly focused on existing institutional mechanisms of environmental management the establishment of new environmental management structures the introduction of incentives to improve natural capital and foster environmental protection and the culture of environmental or green groups virtually no rigorous research has been directed into the nature and significance of the existing relationship between government and civil society in individual country studies with specific reference to the environmental policy sector or into how this relationship may be evolving this book explores this connection in singapore and what causes it to evolve through three case narratives its rationale is to address this gap in the literature from a governance theory perspective that focuses on state adaptation to the external environment and new forms of coordination and collaboration between government

and civil society to tackle new societal problems the application of the governance theory approach to specific case studies is itself a topic that deserves much greater study than what it has so far received

this book details various stages in the introduction establishment and evolution of china s environmental management system by combining a literature review comparative analysis and case study it investigates the environmental management system in several key periods in order to systematically assess the necessary measures and appropriate adjustments the chinese government implemented to reconcile the growing conflicts between economic development and resources conservation in the context of rapid economic growth and economic transformation given its scope the book offers a valuable resource for experts scholars and government officials in related fields
