in this book an international group of public policy scholars revisit the stage of formulating policy solutions by investigating the basic political dimensions inherent to this critical phase of the policy process the book focuses attention on how policy makers craft their policy proposals match them with public problems debate their feasibility to build coalitions and dispute their acceptability as serious contenders for government consideration based on international case studies this book is an invitation to examine the uncertain and often indeterminate aspects of policy making using qualitative analysis embedded in a political perspective

although just a decade ago the destruction of a european state and society through war and genocide remains one of the worst global crises of the post cold war era with reverberations still felt today bombardment and sieges of major towns and cities

concentration and death camps and the mass slaughter and expulsion of civilians were all characteristics of a type of warfare that Europe had never dreamed might return. The war against Bosnia had a major impact on European and wider global consciousness being as it was then the most reported, debated and analyzed conflict to date. But despite the extensive coverage of Bosnia, the author contends the conflict and its origins were certainly misunderstood, there being a significant gulf between media perspectives and the thrust of academic discourse. This multidisciplinary book is based on extensive research into the TV and newspaper framing of the war during the critical early period of its development. Uniquely, the analysis of media is underpinned by an extensive and detailed historical argument about the nature of the wars and the politics of the federation, including the use of media in war-making strategies in Yugoslavia itself. It will be of interest to scholars of IR and politics, media communication and journalism studies and war and genocide studies. Journalists and the general reader will find the book accessible with valuable insights into reporting war and understanding media representation of conflict. Key issues and questions addressed include: the critical use of official sources and propaganda in journalism; how media and policymakers interact to define and frame problems for policy action; what factors limit the accurate reporting of war; what is genocide and how is the genocide convention relevant in practice; and how to report genocide when such coverage conflicts with state interests.

In twelve essays, influential scholars in political science explore the meaning of political leadership from the kaleidoscopic perspectives of the leaders, institutions, goals, procedures, problems and traditions involved. The approaches as varied as the subject itself coalesce around the central question of how leaders interact with, transform or are controlled by the organizations they lead.

The analyst publishes research articles in pure mathematics.

Examines Indian gaming in detail: what it is, how it became one of the most politically charged phenomena for tribes and states today, and the legal and political compromises that shape its present and will determine its future.

Fianna Fáil: The republican party has been defined by its emphasis on partition and its ideological commitment to reunification through its use of anti-partitionist rhetoric. It has been the most vociferous political party in the Republic of Ireland. On Northern Ireland, its emotive and divisive response to the outbreak of the troubles in Northern Ireland was seen most clearly in the arms crisis of 1970, which threatened to destroy the party and the stability of the state in the Republic. However, the party has also been at the centre of the Northern Ireland peace process and the attempts at reconciliation between unionists and nationalists in North and South. Yet there has been no substantive study of Fianna Fáil's language, ideology and policy on Northern Ireland since the outbreak of the troubles. How could the republican party be such a central player in the political changes in Northern Ireland? Has Fianna Fáil changed its traditional republicanism and anti-partitionism? This fascinating and important new book provides an examination of Fianna Fáil's

record on northern ireland since 1968 it outlines the party s response to the troubles and its guiding principles in the search for the solution catherine o donnell argues that the relationship between fianna fáil and sinn fáil is central to understanding fianna fáil s role in the peace process which began with the fianna fáil sinn fáil talks in 1988 she investigates the implications of the peace process and the good friday agreement for fianna fáil s ideology and policy on northern ireland and highlights the continued centrality of the relationship between fianna fáil and sinn fáil to the peace process and politics in the republic of ireland as sinn fáil in make further electoral gains in the republic of ireland this book will be essential reading for anyone wishing to understand how republicanism is a contested electoral resource within southern politics
