introducing advanced macroeconomics growth and business cycles 2nd edition provides students with a thorough understanding of fundamental models in macroeconomics and introduces them to methods of formal macroeconomic analysis split into two sections the first half of the book focuses on macroeconomics for the long run introducing and developing basic models of growth and structural unemployment the second half of the book deals with the economy in the short run focusing on the explanation of business fluctuations this new edition retains the popular pitch and level established in the 1st edition and continues to bridge the gap between intermediate macroeconomics texts and more advanced textbooks

this book brings together contributions in growth theory and macroeconomic dynamics that reflect more recent developments in the ongoing debate over the relative merits of neoclassical and endogenous growth models it focuses on three important areas that have been receiving increasing attention theoretical aspects numerical and statistical aspects and international issues

the study of economic development is inherently grounded in philosophical and ethical assumptions in other words to discuss economic development either at a conceptual level or as a real process necessitates an ethical and philosophical basis the authors of this book believe that islamic economics can serve as such a basis one that emanates from islamic principles and values this book presents a distinctive ethical and philosophical framework one that is grounded in islamic principles and the established literature of islamic economics and finance to analyse and interpret the concept of economic development as well as to propose policy solutions to real world development problems and challenges the book contains theoretical and empirical studies which connect the literature of islamic economics with economic development while some chapters discuss development at the conceptual philosophical level others examine the real world issues faced by developing countries it proposes institutional constructs as well as concrete public policies to face developmental challenges such as fighting poverty and inequality environmental and social sustainability industrialisation and industrial policy and social services and human capital serving as both an introduction and a comprehensive resource this book illustrates how the concepts and problems of economic development can be examined from an islamic economics perspective and as such will equip researchers and students with a basic understanding of how islamic economics interacts with the issues of economic development

first published in 1955 under title economic fluctuations includes bibliographical references

the author shows that the enormous gap between theory and facts in modern macroeconomics can only be eliminated by nonlinear macroeconomic dynamics with the following special characteristics first of all only certain group theoretical invariants generate the correct growth cycles with irregularly varying lengths not any stochastic process as usually applied for this purpose furthermore a special extended value function and generalized human capital are needed for a correct representation of scientific and technological innovation finally the correct nonlinear macroeconomic dynamics are not reducible to microeconomics for both

of the above mentioned reasons

this is a book on deterministic and stochastic growth theory and the computational methods needed to produce numerical solutions exogenous and endogenous growth models are thoroughly reviewed special attention is paid to the use of these models for fiscal and monetary policy analysis modern business cycle theory the new keynesian macroeconomics the class of dynamic stochastic general equilibrium models can be all considered as special cases of models of economic growth and they can be analyzed by the theoretical and numerical procedures provided in the textbook analytical discussions are presented in full detail the book is self contained and it is designed so that the student advances in the theoretical and the computational issues in parallel excel and matlab files are provided on an accompanying website see preface to the second edition to illustrate theoretical results as well as to simulate the effects of economic policy interventions the structure of these program files is described in numerical exercise type of sections where the output of these programs is also interpreted the second edition corrects a few typographical errors and improves some notation
