this book explores the changing nature of power and identity from the iron age to the roman period in britain it provides fresh insights into the origins and nature of one of the lesser known but perhaps most significant late iron age oppida in britain bagendon in gloucestershire

through the use of practical examples and solutions pharmaceutical statistics practical and clinical applications fifth edition provides the most complete and comprehensive guide to the various statistical applications and research issues in the pharmaceutical industry particularly in clinical trials and bioequivalence studies

this first of two volumes presents the archaeological evidence of a long sequence of settlement and funerary activity from the beaker period early bronze age c 2000 bc to the early iron age c 500 bc at the unusually long occupied site of cladh hallan on south uist in the western isles of scotland particular highlights of its sequence are a cremation burial ground and pyre site of the 18th 16th centuries bc and a row of three late bronze age sunken floored roundhouses constructed in the 10th century bc beneath these roundhouses four inhumation graves contained skeletons two of which were remains of composite collections of body parts with evidence for post mortem soft tissue preservation prior to burial they have proved to be the first evidence for mummification in bronze age britain cladh hallan s remarkable stratigraphic sequence preserved in the machair sand of south uist includes a unique 500 year sequence of roundhouse life in late bronze age and iron age britain one of the most important results of the excavation has come from intensive environmental and micro debris sampling of house floors and outdoor areas to recover patterns of discard and to interpret the spatial use of 15 domestic interiors from the late bronze age to the early iron age from cladh hallan s roundhouse floors we gain intimate insights into how daily life was organized within the house where people cooked ate worked and slept such evidence rarely survives from prehistoric houses in britain or europe and the results make a profound contribution to long running debates about the sunwise organisation of roundhouse activities activity at cladh hallan ended with the construction and abandonment of two unusual double roundhouses in the early iron age one appears to

have been a smokery and steam room and the other was used for metalworking

in a fluent clear and lively style this translation by two of maslov s junior colleagues brings the work of the late soviet scientist s yu maslov to a wider audience maslov was considered by his peers to be a man of genius who was making fundamental contributions in the fields of automatic theorem proving and computational logic he published little and those few papers were regarded as notoriously difficult this book however was written for a broad audience of readers and describes elegant examples of applications in such fields as computer science artificial intelligence operations research economic modeling and biological modeling among others the book also brings to light the work by the american mathematician e l post which inspired maslov s own work in the development of a general theory and which has been long neglected by mathematical logicians and systems theorists in the united states the book s first chapter introduces the rules of the game part i mathematics of calculi covers e l post s canonical systems deductive systems and algorithms and probabilistic calculi and deductive information part ii horizontal modeling takes up a toy economy the calculi of technological possibilities and the development of rules part iii vertical modeling deals with the topics of to fight and to search and the consequences of the asymmetry of cognitive mechanisms vladimir lifschitz is affiliated with the department of computer science at stanford university and michael gelfond with the department of electrical engineering and computer science at the university of texas el paso theory of deductive systems and its applications is included in the foundation of computing series edited by michael garey

the mission of department of homeland security bioterrorism risk assessment a call for change the book published in december 2008 is to independently and scientifically review the methodology that led to the 2006 department of homeland security report bioterrorism risk assessment btra and provide a foundation for future updates this book identifies a number of fundamental concerns with the btra of 2006 ranging from mathematical and statistical mistakes that have corrupted results to unnecessarily complicated probability models and models with fidelity far exceeding existing data to more basic questions about how terrorist behavior should be modeled rather than merely criticizing what was done in the btra of 2006 this new nrc book consults outside experts and collects a number of proposed alternatives that could improve dhs s ability to assess potential terrorist behavior as a key element of risk informed decision making and it explains these alternatives in the specific context of the btra and the bioterrorism threat
