offers a practical and theoretical coverage of investments market this book places emphasis on asset allocation and offers a treatment of futures options and other derivative security markets

bodie kane and marcus investments and portfolio management sets the standard for graduate mba investments textbooks it blends practical and theoretical coverage while maintaining an appropriate rigor and a clear writing style its unifying theme is that security markets are nearly efficient meaning that most securities are priced appropriately given their risk and return attributes the text places greater emphasis on asset allocation and offers a much broader and deeper treatment of futures options and other derivative security markets than most investment texts it is also the only graduate investments text to offer an online homework management system mcgraw hill s connect plus finance

the market leading undergraduate investments textbook essentials of investments 9e by bodie kane and marcus emphasizes asset allocation while presenting the practical applications of investment theory the authors have eliminated unnecessary mathematical detail and concentrate on the intuition and insights that will be useful to practitioners throughout their careers as new ideas and challenges emerge from the financial marketplace the ninth edition includes increased attention to changes in market structure and trading technology while continuing to be organized around one basic theme that security markets are nearly efficient connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need when they need it and how they need it so that your class time is more engaging and effective

this book emphasizes the applications of statistics and probability to finance the basics of these subjects are reviewed and more advanced topics in statistics such as regression arma and garch models the bootstrap and nonparametric regression using splines are introduced as needed the book covers the classical methods of finance and it introduces the newer area of behavioral finance applications and use of matlab and sas software are stressed the book will serve as a text in courses aimed at advanced undergraduates and masters students those in the finance industry can use it for self study

as opposed to a bank bailout a bail in occurs when creditors are forced to bear some of the burden of bank failure the principal aim of this restructuring tool is to eliminate some of the risk for taxpayers several jurisdictions including switzerland and the european union eu have adopted legal provisions regarding the bail in but until this book literature on its implementation has been scarce offering a detailed and comparative analysis of eu and swiss law relating to bail ins and their economic impact this is the first book to provide in depth coverage of this new method of dealing with the failure of systemically important banks in its contextualisation and analysis of the bail in resolution tool the book identifies and discusses the legal and economic issues that arise including such aspects as the following the legal and economic properties of bail in capital the regulatory standard on total loss absorbing capacity tlac issued by the financial stability board fsb the scope and sequence of liabilities subjected to bail in the legal position of stakeholders affected by a bail in strategies and procedures for the implementation of a bail in the limited circumstances under which government rescues should be available and cross jurisdictional issues and aspects of international cooperation as well as case studies and analyses of legal issues with particular reference to swiss law and the european bank resolution and recovery directive 2014 59 eu the author applies economic

concepts to the analysis of the law international developments in particular standards issued by leading regulatory bodies are also covered this book will be welcomed by legal practitioners working in banks and in banking regulation and by policymakers seeking information on the practical issues involved as a detailed analysis of a new and highly significant development in banking law it will also be of great interest to academics

bachelor thesis from the year 2021 in the subject business economics investment and finance grade 1 o language english abstract this study is concerned with an empirical analysis of asset pricing more specifically this paper examines whether multifactor asset pricing models are able to explain variation in reit returns in the us and japan in addition to traditional multifactor models an alternative four factor model aff was developed considering net profit margin as an additional risk factor thence this paper seeks to provide valuable information for investors and fund managers regarding their indirect real estate investment selection using a sample period between july 1994 us july 2011 japan to december 2020 rigorous multiple time series regression is applied to calculate factor loadings for each risk factor and the corresponding alpha values of each model to evaluate their effectiveness in explaining variation and cross section of reit returns most studies on asset pricing models focus on size and value sorted portfolios as dependent variables this paper broadens the approach with four other double sorted test portfolios to check the robustness of each single factor to explain return anomalies results show that market premium and size premium represent risk factors for us reits whereas market premium and value premium are suitable risk factors for japanese reits the momentum factor does not capture risk and is insignificant in both markets the study shows low correlations between traditional and reit specific as well as between us and japanese risk factors this suggests that firstly risk factors are country specific and secondly that they are asset specific moreover the fama french three factor model ff3 clearly outperforms the capm while the carhart four factor model ch4 marginally improves the explanatory power over the ff3 this is observed in both markets outcomes demonstrate that the alternative four factor model aaf does not improve prediction power for returns of japanese reits compared to the ff3 and ch4 on the contrary results are ambiguous concerning us reits while the additional risk factor net profit margin generates a negative return the model is superior to the ff3 and ch4 in terms of explaining variation and cross section of returns

diploma thesis from the year 2007 in the subject business economics investment and finance grade 1 o european business school international university schlo reichartshausen oestrich winkel language english abstract in a time of tremendous advances in technology it seems striking why the location of corporate headquarters should matter for the firm's stock return at first glance low information and communication costs are thought to facilitate the interaction between market participants all around the world and thus deem the role of geographical location as marginal this reasoning however does not take investors behavior into account even if over the past decades international capital markets have widely been liberalized and the variety of investment opportunities across countries has grown substantially many investors do not take the risk reduction potential of foreign assets into consideration despite the extensive benefits of international diversification investors still overweight domestic and local assets in their portfolios although this home bias has drawn much academic attention and its existence is commonly accepted a satisfactory rationale could not yet be obtained further the resulting economic implications for asset pricing remain unexplored yet locality could be highly relevant for cost of capital calculation asset allocation and performance evaluation 1 as a result it is of crucial importance to investigate the relationship between portfolio holdings of investors and stock pricing patterns to shed light on a potential geographical component of asset pricing the lack of academic research motivates to explore this area in greater detail the purpose of this thesis is to fill the existing gap and establish a link between local bias and asset pricing therefore a detailed overview of the home bias puzzle as well as of local asset pricing is presented the economic impact of local bias on stock returns is empirically

the market leading undergraduate investments textbook essentials of investments 8e by bodie kane and marcus emphasizes asset allocation while presenting the practical applications of investment theory the authors have eliminated unnecessary mathematical detail and concentrate on the intuition and insights that will be useful to practitioners throughout their careers as new ideas and challenges emerge from the financial marketplace the eighth edition has been fully updated to reflect the recent financial crisis and includes a new chapter on hedge funds

bodie kane and marcus investments is the leading textbook for the graduate mba investments market it is recognized as the best blend of practical and theoretical coverage while maintaining an appropriate rigor and clear writing style its unifying theme is that security markets are nearly efficient meaning that most securities are usually priced appropriately given their risk and return attributes the text places greater emphasis on asset allocation and offers a much broader and deeper treatment of futures options and other derivative security markets than most investment texts

this new international edition provides increased coverage of the procedures for estimating the cost of capital expanded coverage of risk management techniques and the use and misuse of derivatives and additional coverage of agency problems
