there is hardly a technical library in the world in which the volumes of the chemical formulary volumes 1 34 do not occupy a prominent place it does not duplicate any of the formulas included in previous volumes but lists a wide array of modern and salable products from all branches of the chemical industries an excellent reference for formulation problems contents i introduction ii adhesives iii beverages and foods iv cosmetics v coatings vi detergents vii drugs viii metal treatments ix polishes x elastomers polymers and resins xi miscellaneous appendix index preface chemistry as taught in our schools and colleges concerns chiefly synthesis analysis and engineering and properly so it is part of the right foundation for the education of the chemist many a chemist entering an industry soon finds that most of the products manufactured by his concern are not synthetic or

definite complex compounds but are mixtures blends or highly complex compounds of which he knows little or nothing the literature in this field if any may be meager scattered or obsolete even chemists with years of experience in one or more industries spend considerable time and effort in acquainting themselves with any new field which they may enter consulting chemists similarly have to solve problems brought to them from industries foreign to them there was a definite need for an up to date compilation of formulae for chemical compounding and treatment since the fields to be covered are many and varied an editorial board of chemists and engineers engaged in many industries was formed many publications laboratories manufacturing firms and individuals have been consulted to obtain the latest and best information it is felt that the formulas given in this volume will save chemists and allied workers much time and effort

practicing computer engineers and graduate students in computer architecture alike will find this reference book invaluable as it describes the tradeoffs and design philosophy that lead to the development of the alpha architecture and its implementation alpha architecture and implementation provides a comprehensive description of all major aspects of alpha systems the book includes an overview of the history of risc development in the computer industry and at digital the alpha architecture all the major processor chips and system implementations the book also covers risc concept and design styles and provides an overview of other risc architectures and descriptions of the new sparc mips power pc and pa risc microprocessors introduced in 1995 the book also discusses operating system porting issues compiler techniques and binary translation dileep bhankdarkar was a senior consulting engineering in the alpha systems business group at digital equipment corporation he has been responsible for leading the technical direction and product strategy of alpha personal systems alpha and vax servers and high performance computing he was the architecture manager for microvax chief architect for vax vector processing and co architect of the prism risc architecture on which alpha is based he has a btech degree in electrical engineering from the indian institute of technology in bombay and an ms and phd in electrical engineering from carnegie mellon university dileep holds 15 us patents and is senior member of ieee he is the author of more than 30 technical publication on computer architecture semiconductor technology and performance analysis he currently works for intel corporation only comprehensive treatise on alpha architecture chips and systems insider s view of alpha a comprehensive discussion of alpha with overviews of competing architectures
