while many engineering books speak to doing engineering precious few focus on the concept of being an engineer hence this book which is a reflection on the human side of engineering the contents are drawn from two different but parallel columns ron britton wrote for the keystone professional the official magazine of engineers geoscientists manitoba formerly the association of professional engineers and geoscientists of manitoba the thoughts on design column started in 2001 as an explanation of the opportunities provided by the award of one of the first natural sciences and engineering research council of canada chairs in design engineering the engineering philosophy 101 column came about in 2006 following a discussion relating to the philosophical foundations of engineering ethics consequently this is a book about how one engineer has reacted to circumstances that involve engineers either directly or peripherally including engineering successes and failures it reflects on how engineers should and hopefully do fit into and contribute to our ever changing world speaks to the privileges and responsibilities society has provided the profession in exchange for the right to self government within that profession and reflects on the constraints of professional practice and the creative possibilities that parallel those limitations
